Q.P. Code: 36598

Duration: 3 Hours Marks: 80 N.B: (1) Question No.1 is compulsory. (2) Attempt any three questions from remaining questions. (3) Figures to the right indicate full marks. Q1(a)Consider the following code for(m=10;m>0;m--)a[m]=a[m]+2x=y+2;x = x%2;State the spatial locality and Temporal Locality in the code. 4 (b) State the advantages of Vertical Microinstructions over Horizontal Microinstructions. 4 (c) Consider the execution of a Program with 15000 instructions by a linear pipeline processor with a clock rate of 25 Mhz. Assume that the instruction pipeline is 5 stages one instruction is issued per clock cycle. The penalties due to branch instructions are ignored. i) Calculate the speedup factor as compared with Non Pipelined processor. ii) What is efficiency and throughput of this pipelined processor? 4 (d) Compare the RISC and CISC features 4 (e) Differentiate between Cache Look Aside Architecture and Cache Look through Architecture. 4 Q2 (a) Explain the Write Techniques in Cache Memory .Explain how Snoopy Controller Is used to implement Cache Coherency. 10 (b) Consider a 4-way set associative Cache Mapping with Cache Block Size=16 bytes Cache size=8k, Main Memory Size =64k. Design a cache structure and show how the Processor address is interpreted. 10

Paper / Subject Code: 37203 / COMPUTER ORGANIZATION

Q.P. Code: 36598

Q3 (a) Explain the Virtual Address to Physical address Translation for the followirtual Memory=128k and Main Memory=32k, page size = 1k. Illustrate help of a example.	
(b) Compare Paging and Segmentation	
Q4 (a) Explain the various I/O Data transfer Techniques.	8
(b) Explain Microprogrammed Control Unit and compare its Control Men	nory with Nano-
Programming.	12
Q5 (a) Explain the different addressing modes of IA-32 with suitable example	8
(b) Write microinstructions for the instruction MOV [R_0], R_3 . Explain t unit with reference to the above instruction. Design a Combinational ci	2 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4
RUN control signal using suitable control signals.	12
Q6) Write short notes on	
a) Memory Interleaving	6
b) Flynn's Classification	7
c) Page Replacement policies	7
