## [5522]-101 S.Y. B.Sc. (Regular) MATHEMATICS MT-211: Multivariable Calculus-I

(Semester-I) (2013 Pattern) (Paper-I)

*Time : 2 Hours]* 

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.

**Q1)** Attempt any FIVE of the following.

a) Find an equation of the level curve of  $f(x, y) = \sqrt{x^2 - 1}$  that passes through the point (1,0).

b) Find 
$$\lim_{(x,y)\to(2,0)} \frac{\sqrt{2x-y-2}}{2x-y-4}, \ 2x-y\neq 4$$

- c) Define the tangent plane and normal line at the point (a,b,c).
- d) Find the directions in which  $f(x, y) = x^2 + xy + y^2$  increase most rapidly at point (-1,1).
- e) State strong form of Fubini's theorem.
- f) Find the derivative of  $f(x, y) = 2x^2 + y^2$  at the piont p(-1,1) in the direction of  $\overline{u} = 3\overline{i} - 4\overline{j}$ .
- g) Find stationary point of  $f(x, y) = x^2 4xy + y^2 + 6y + 2$ .

**Q2)** Attempt any TWO of the following:

a) If w = f(u, v) is a differentiable function of two variables u and v,  $u = \phi(x, y)$ ,  $v = \psi(x, y)$  are differentiable functions of x and y then prove that the composite function  $w = f(\phi(x, y), \psi(x, y))$  is also differentiable and

$$\frac{\partial w}{\partial x} = \frac{\partial w}{\partial u} \cdot \frac{\partial u}{\partial x} + \frac{\partial w}{\partial v} \cdot \frac{\partial v}{\partial x} \,.$$

SEAT No. :

[Total No. of Pages : 2

[Max. Marks:40

[10]

b) Define simulteneous limit of function of two variables and show that  $f(x, y) = \frac{x^4}{x^4 + y^2}$  has no limit as  $(x, y) \rightarrow (0, 0)$ , by considering different paths.

c) If 
$$u = (x^2 + y^2 + z^2)^{-\frac{1}{2}}$$
, show that  
 $\left(\frac{\partial u}{\partial x}\right)^2 + \left(\frac{\partial u}{\partial y}\right)^2 + \left(\frac{\partial u}{\partial z}\right)^2 = u^4$ 

**Q3)** Attempt any Two of the following:

[10]

- a) Explain lagrange's method of undetermined multiplier.
- b) If  $f(x, y) = xy^2$ , then find approximate value of f(2.01, 3.02), using differentials.
- c) Expand  $f(x, y) = x^2 + 3y 2$  in powers of (x-1) and (y-2).
- Q4) Attempt any ONE of the following.

[10]

- a) i) By changing the order of integration evaluate  $\int_{0}^{\infty} \int_{x}^{\infty} \frac{e^{-y}}{y} dy dx$ .
  - ii) Evaluate  $\int_{0}^{1} \int_{0}^{1-x} \int_{0}^{x+y} e^{z} dx dy dz$ .
- b) i) Find the volume of the sphere of radius a, using the spherical polar co-ordinates.
  - ii) Evaluate  $\iint_{D} (y^2 + x) dx dy$ , where D is bounded by the parabolas  $y = x^2$ and  $x = y^2$

### MT-212 (A): Discrete Mathematics

(2013 Pattern) (Semester - I) (Paper - II (A))

Time : 2 Hours]

Instructions to the candidates:

- All questions are compulsory. 1)
- 2) Figures to the right indicate full marks.
- Use of calculator is not allowed. 3)

*Q1*) Attempt any <u>FIVE</u> of the following:

- State principle of duality. Write dual of  $(P \land F) \land T$ . a)
- What is the truth value of  $p \rightarrow (q \leftrightarrow p)$  if p and q has truth values T and b) F respectively?
- Prove that  $\sim (p \land q) \equiv (\sim p) \lor (\sim q)$ . c)
- Find the number of ways that a party of seven persons can arrange d) themselves in a row of seven chairs.
- Define tautology; Give one example. e)
- Find the number of permutations of the letters in the word 'DADDY'? f)
- Write Inclusion-Exclusion principle for three sets. **g**)
- Q2) Attempt any TWO of the following:
  - Show that  $[p \rightarrow (q \land r)] \equiv (p \rightarrow q) \land (p \rightarrow r)$ . a)
  - If a collection of objects consists of  $n_1$  identical objects of type 1,  $n_2$ b) identical objects of type 2, .....  $n_k$  identical objects of type k where  $n_1 + n_2 + \dots + n_k = n$  then prove that the total number of arrangements of these *n* objects is  $\frac{n!}{n_1! \times n_2! \times ... \times n_k!}$ .

How many ways are there to select 12 balls from 20 red, 22 blue and 24 c) green balls, so that at least 6 blue balls are selected?

*P.T.O.*

- *Q3*) Attempt any TWO of the following:
  - a) Test the validity of the following argument using laws of logic.

I like meeting people. I like travelling also. If I like meeting people and travelling then I am considered to be a nice person. Hence I am a nice person.

- b) Given 20 points, no three of which are collinear. Find
  - i) How many straight lines they will determine?
  - ii) How many triangles they will determine?
- c) Prove that if 3n + 2 is even then *n* is even integer by using proof by contrapositive.
- *Q4*) Attempt any ONE of the following:
  - a) i) Prove that  ${}^{n}C_{r} + {}^{n}C_{r-1} = {}^{n+1}C_{r}$ .
    - ii) Translate into symbolic form
      - 1) All Juniors are clever.
      - 2) Square of every non zero integer is greater than or equal to zero.
  - b) i) Find the number of positive integers less than 30 which are relatively prime with 30 using Inclusion Exclusion principle.
    - ii) How many solutions do the equation  $x_1 + x_2 + x_3 = 11$  have, where  $x_1, x_2, x_3$  are integers?

## MT-212 (B): Laplace Transform and Fourier Series (2013 Pattern) (Semester - I) (Paper - II (B))

#### Time : 2 Hours]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.

esi *Q1*) Attempt any <u>FIVE</u> of the following:

- Find  $L{\sin^2 kt}$ . a)
- Find  $L\{t^2e^{3t}\}$ . b)
- Find  $\frac{7}{2}$ . c)
- Define Unit Step Function. d)
- Find  $L^{-1}\left\{\frac{1}{s^2+2s+5}\right\}$ . e)
- Solve the differential equation y'' + y = 0, with y(0) = 1, y'(0) = 0 by f) using Laplace Transform.
- Define Inverse Laplace Transform. g)
- **Q2**) Attempt any TWO of the following:
  - If  $L{f(t)} = \phi(s)$  then prove that  $L{t^n f(t)} = (-1)^n \frac{d^n}{ds^n} {\phi(s)}$ , where n a) is positive integer.
  - Find  $L\{t\sin^3 2t\}$ . b)

c) Evaluate 
$$\int_{0}^{\infty} \frac{e^{-4t} - e^{-2t}}{t} dt$$

3

[Max. Marks :40

**[10]** 

*Q3*) Attempt any TWO of the following:

a) If 
$$L^{-1}{\phi(s)} = f(t)$$
, then prove that  $L^{-1}{\phi^n(s)} = (-1)^n t^n f(t)$ .

b) Show that 
$$L^{-1}\left\{\frac{1}{\sqrt{s+a}}\right\} = \frac{e^{at}}{\sqrt{\pi t}}$$

c) Solve 
$$y''(t) + y''(t) = e^t + t + 1$$
, where  $y(0) = y'(0) = y''(0) = 0$ .

#### *Q4*) Attempt any ONE of the following:

## [10]

- a) State and prove convolution theorem and hence find  $L^{-1}\left\{\frac{1}{s(s^2+1)}\right\}$ .
- b) Define Fourier series. Find the Fourier series for the function, f(x) = |x|, for all x∈ [-π,π].

**P311** 

## [5522]-103 S.Y. B.Sc. (Regular) PHYSICS

## PH - 211 : Mathematical Methods in Physics (2013 Pattern) (Semester - I) (Paper - I)

*Time : 2 Hours] Instructions to the candidates:* 

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Use of calculator and logtable is allowed.

*Q1*) Attempt <u>All</u> of the following:

- a) If  $a ib = \sqrt{x + iy}$  determine x and y.
- b) Define vector field with examples.
- c) Write necessary condition for exact differential.
- d) Define coplanar vectors.
- e) Determine the modulus of z = 2 + 5i.
- f) Prove that  $\overline{V} = 3y^4 z^2 \hat{i} + 4x^3 z^2 \hat{j} 3x^2 y^2 \hat{k}$  is a solenoidal vector.
- g) Explain the term linearity.
- h) If z = 3 + 2i, find complex conjugate of z and product  $z\overline{z}$ .
- i) Decide degree and order of following differential equation  $\frac{d^2y}{dr^2} + 2\frac{dy}{dr} + y = 0.$
- j) Find the value of 'p' which makes vector  $\overline{A} = p\hat{i} + 3\hat{j} \hat{k}, \overline{B} = 2\hat{i} + 3\hat{j} 4\hat{k}$  are perpendicular.

Q2) Attempt any two of the following.

- a) Obtain the quadratic equation in Z, if its roots are  $(3 \pm 4i)$ .
- b) Poiseuillis formula for the flow of a viscous liquid through a capillary

tube is given by  $V = \frac{\pi p r^4}{8\eta l}$ .

*P.T.O.*

[Max. Marks: 40

SEAT No. :

Where symbols have their usual meaning, if the errors in the measurement of p, r, l are 1%, 1.5% and 2% respectively. Find the maximum possible relative and percentage error in the measurement of V.

- c) Show that  $\overline{F} = \cos y \,\hat{i} x \sin y \,\hat{j} \cos z \,\hat{k}$  is conservative field.
- Q3) Attempt any two of the following.
  - a) Using the method of differential equation. Find the approximate value of  $[(6.01)^2 + (8.01)^2]^{y_2}$
  - b) Show that the vector field represented by  $\overline{F} = (z^2 + 2x + 3y)\hat{i} + (3x + 2y + z)\hat{j} + (y + 2zx)\hat{k}$  is irrotational but not solenoidal.
  - c) Show the point x = 0 is regular singular point of Bessel differential equation.  $x^2y'' + xy' + (x^2 n^2)y = 0$ .
- **Q4)** A) Attempt (a) or (b) of the following.
  - a) i) Show that  $\overline{\nabla}.\overline{\nabla}\phi = \nabla^2\phi$ . [4]
    - ii) Determine the value of  $(1 + i)^8$ . [4]
  - b) i) Find the angle between  $\overline{A} = 2\hat{i} + 2\hat{i} \hat{k}$  and  $\overline{B} = 6\hat{i} 3\hat{j} + 2\hat{k}$ . [4]
    - ii) Find the slope of the tangent to the curve  $x^3 + 3xy^2 y^3 = 0$  at x = -2, and y = 1. [4]
  - B) Attempt any <u>one</u> of the following.
    - a) Prove that the vectors  $\overline{A} = \hat{i} + 3\hat{j} + \hat{k}$   $\overline{B} = 3\hat{i} + 9\hat{j} + 3\hat{k}$  are parallel to each other. [2]
    - b) Find the sum and difference of complex number  $z_1 = 3 2i$ ,  $z_2 = 4 + 3i$ . [2]

### PHYSICS

## PH - 212 (B) : Instrumentation (2013 Pattern) (Semester - I) (Paper - II)

*Time : 2 Hours]* 

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Draw neat diagrams wherever necessary.
- 4) Use of log tables and calculator is allowed.

**Q1)** Attempt all of the following (one mark each)

- a) Define input bias current.
- b) What is linearity?
- c) Define atmospheric pressure.
- d) State any one type of analog recorder.
- e) Define dead zone.
- f) What do you mean by cantilever beam?
- g) Which principle is used in platinum resistance thermometer?
- h) Draw circuit diagram of buffer amplifier using OPAMP.
- i) What is Piezo-electric transducer?
- j) Which principle is used in platinum resistance thermometer?

[10]

*P.T.O.* 

SEAT No. :

[Total No. of Pages : 6

[Max. Marks :40

- **Q2)** Attempt any two of the following :
  - a) Write a note on thermal element as a first order system of measurement.

[5]

- b) What do you mean by variable inductance type transducer? Explain how displacement is measured with change in number of turns in inductive transducer. [5]
- c) Explain with circuit diagram, OPAMP as differentiate. [5]
- **Q3)** Attempt any two of the following :
  - a) A capacitive transducer uses two quartz diaphragms of area 600 mm<sup>2</sup> separated by a distance 3 mm. A pressure of 1000 KN/m<sup>2</sup> when applied to top diaphragm produces a deflection of 0.5 mm. The capacitance is 370 PF when no pressure is applied to the diaphragms. Find the value of capacitance after application of pressure of 1000 KN/m<sup>2</sup>. [5]
  - b) What will be the outputs for the following circuit? Also mention the configuration of the circuit. [5]

c) When a pressure is applied for a membrane type diaphragm of radius
 5 cm and thickness 0.15 cm shows maximum deflection at centre
 0.05 cm. Find pressure acting on it.

(Given : Young's modulus = 
$$12 \times 10^{11} \text{ N/m}^2$$
) [5]

- Q4) A) Attempt (a) or (b) of the following :
  - a) i) Write a short note on U-tube manometer as second order system of measurements. [4]
    - ii) Describe with neat diagram, X Y recorder. [4]
  - b) i) Explain concept of virtual ground in OPAMP. [4]
    - ii) Explain load cell with suitable diagram. [4]
  - B) Attempt any one of the following :

\*\*\*

- a) Draw the circuit diagram of instrumentation amplifier using three OPAMP and state the expression for the output voltage. [2]
- b) A manufacturer calibrates a temperature gauge of  $100^{\circ}$ C range with  $\pm 0.5^{\circ}$ C. If it is used for temperature measurement of 50°C, what will be the probable minimum and minimum value at temperature shown by gauge? [2]

## [5522] - 104 S.Y.B.Sc. PHYSICS **PH - 212 (A1) : Electronics - I** (2013 Pattern) (Semester - I) (Paper - II)

Time : 2 Hours]

Instructions to the candidates:

- 1) All questions are compulsory.
- Figures to the right indicate full marks. 2)
- 3) Draw neat diagram wherever necessary.
- 4) Use of log tables and calculator is allowed. 20

**Q1)** Attempt all of the following.

- State maximum power transfer theorem. a)
- State Thevenin's theorem. b)
- Define current amplification factor  $\beta$ . c)
- Draw symbol of OP-AMP. d)
- e) Draw symbol of UJT.
- $Convert (5A)_{16}$  into equivalent binary number. f)
- Which gates are called as universal gates? g)
- Define CMRR. h)
- i) What is Barkhausen criterion of oscillation?
- What is regulated power supply? j)

[Max. Marks:40

- **Q2)** Attempt any two of the following :
  - a) Explain with circuit diagram output characteristics of a transistor in CE configuration. [5]
  - b) What is the output of the following circuit?

- c) Show that gain of an amplifier with feedback is  $A' = \frac{A}{1 \beta A}$ . [5]
- **Q3)** Answer any two of the following.
  - a) For a transistor shown in a given circuit, the voltage drop across  $2k\Omega$  collector resistance is 1V. If  $\beta = 50$ , find the base current. [5]

b) Using Norton's theorem, Nortonize the following circuit.

[5]

[5]

[5522]-104

c) Find the Boolean expression and give truth table for the following logic circuit. [5]

Q4) A) Attempt (a) or (b) of the following :

	a)	i)	Describe d.c. load line using common emitter amplifie	er circuit.		
				[4]		
		ii)	Describe the action of capacitor filter circuit.	[4]		
	b)	i)	State and prove De-Morgan's theorems with their true	th tables.		
				[4]		
		ii)	Explain the concept of virtual ground in OP-AMP.	[4]		
B)	Attempt any one of the following :					
	a)	Dra	w Pin diagram of IC741.	[2]		
	b)	Cor	nvert following binary numbers into equivalent decimal	numbers.		
		100	11, 10101	[2]

#### CHEMISTRY

## CH-211: Physical and Analytical Chemistry (2013 Pattern) (Paper - I) (Semester - I)

*Time : 2 Hours]* 

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Neat diagrams must be drawn wherever necessary.
- 3) Figures to the right side indicate full marks.
- 4) Use of calculator is allowed.
- 5) Answer to both sections should be written in the same answer book.

### SECTION-I

#### (Physical Chemistry)

*Q1*) Answer the following:

- a) What is mean by infinite reading?
- b) Write the rate law equation for the reaction  $2A + H_2 B \rightarrow \text{product.}$
- c) Define Lambert's law.
- d) What is mean by photosensitization reaction?
- e) State Nernst distribution law.

#### *Q2*) a) Attempt <u>ANY TWO</u> of the following:

- i) Distinguish between order and molecularity of the reaction.
- ii) Derive the expression for rate constant for second order reaction with equal initial concentration.
- iii) What is photo catalysis? Explain with suitable example.

*P.T.O.* 

#### SEAT No. :

[Total No. of Pages : 3

[5]

[Max. Marks :40

[6]

- b) Attempt <u>ANY TWO</u> of the following:
  - i) Explain any two properties of physical methods to determine rate of chemical reaction.
  - ii) Explain the term 'Chemiluminescence'.
  - iii) Write in short about 'Fluorescence'.
- *Q3*) Solve <u>ANY TWO</u> of the following:
  - a) The rate constant for the first order reaction is  $4.5 \times 10^{-2}$  min<sup>-1</sup>. Calculate the time required to complete 70% of reaction.
  - b) For a given photochemical reaction,  $2.22 \times 10^{18}$  photons are absorbed per second. After 900 seconds,  $5.55 \times 10^{-5}$  moles of product is formed. Calculate the quantum yield of the reaction. (Given N= 6.023 ×10<sup>23</sup> molecules.)
  - c) Calculate the amount of solute extracted from 600 ml of an aqueous solution containing 10 gm of solute on extracting with 100 ml each of ether in two lots. (Given: partition coefficient of solute in water to ether is 2)

#### **SECTION-II**

#### (Analytical Chemistry)

- *Q4*) Answer the following
  - a) Define the term 'Qualitative Analysis'.
  - b) Define 'Precision'.
  - c) Which is the group reagent for III B group in qualitative analysis?
  - d) Why is  $NH_{A}Cl$  added before  $NH_{A}OH$  in inorganic qualitative analysis?
  - e) Find the proper number of significant figures in 0.0069 gm and 12.09 gm.

2

[5]

[5]

- *Q5*) a) Attempt <u>any two</u> of the following:
  - i) What is common ion effect? Explain one application of it in inorganic qualitative analysis.
  - ii) How is aldehyde detected? Give its characteristic tests.
  - iii) Explain the Kjeldahl's method of estimation in an organic compound.
  - b) Answer <u>any two</u> of the following:
    - i) Discuss the effect of dil. HCl in presence of  $H_2S$  in inorganic qualitative analysis.
    - ii) Explain the terms
      - 1) Absolute error
      - 2) Relative error
    - iii) What is yellow ammonium sulphide? Discuss use of yellow ammonium sulphide in inorganic qualitative analysis.
- *Q6*) Solve <u>any two</u> of the following:
  - a) Following weights were obtained by a person an repeating the same experiment four times: 15.3, 17.6, 16.8 and 15.9 gm. Calculate the mean deviation and standard deviation.
  - b) The solubility product of AgCl is  $1.2 \times 10^{-10}$ . What is the solubility of AgCl in water if 25 ml 0.1M AgNO<sub>3</sub> are added to 20ml 0.1 m NaCl solution.
  - c) An organic compound on analysis gave 68.84% carbon and 4.92% hydrogen. Find its empirical formula.

- All questions are compulsory. 2)
- 3) Figures to the right side indicate full marks.

#### **SECTION - I**

## (Organic Chemistry)

**Q1**) Answer the following.

- Define enantiomerism. a)
- t-butyl cyclohexane exists in equitorial form. Explain. b)
- Benzyl chloride does not undergo elimination reaction. Why? c)
- Define free radical. d)
- Define nucleophile with suitable example. e)
- Attempt any two of the following. *Q2*) a)
  - Define threo isomer. Assign R/s configuration for i)

*P.T.O.* 

[Total No. of Pages : 3

[5]

**SEAT No. :** 

**[6]** 

[Max. Marks :40

- ii) Draw all possible conformations of 1, 3 dimethyl cyclohexane and comment on their stability.
- Explain addition of HBr to 1-butene in presence of  $H_2O_2$  with iii) mechanism.
- Assign (A) and (B) of the following reactions (Any Two) [4] **b**)

i) 
$$c_{H_3} - c = c_{H-c_{H_3}} + H_{Br} \xrightarrow{H_2O_2} (A) \xrightarrow{aq}_{KOH} (B)$$
  
ii)  $c_{H_3} - c'_{-H} + H_{-c'_{-H}} \xrightarrow{NaOH} (A) \xrightarrow{\Delta} (B)$   
iii)  $p_h \xrightarrow{C_{H_3}} + aq$ . NaOH  $(A) \xrightarrow{CO}_{K_2C_{Y_2}O_7} (B)$   
npt any two of the following. [5]

- Q3) Attempt any two of the following.
  - Axial methyl cyclohexane is unstable than equatorial methyl cyclohexane. a) Explain.

[5]

[5]

- Explain limitations of Bayer's strain theory with suitable example. b)
- Discuss stereochemistry of SN<sup>2</sup> reaction with suitable example. c)

### **SECTION - II** (Inorganic Chemistry)

Q4) Answer the following.

- Wht is ore? a)
- What is metal cladding? **b**)
- What is cryolite? c)
- Give the composition of wrought iron. d)
- Name the metal used for tinning. e)

#### [5522]-106

#### 2

- *Q5*) a) Answer any two of the following.
  - i) What is passivity? What is electrochemical passivity? What are its applications?
  - ii) Explain in brief acid Bessemer process?
  - iii) Give physico-chemical principles of aluminium extraction.
  - b) Attempt any two of the following.
    - i) Explain the effect of impurity on corrosion.
    - ii) Explain the refining of metals by
      - 1) Poling
      - 2) Electrolytic refining.
    - iii) What are different commercial forms of iron?

*Q6*) Answer any two of the following.

- a) What is blast furnace? Explain it's working.
- b) Define the term electroplating. Explain galvanising process.
- c) Distinguish between roasting and calcination.

## BO - 211 : Taxonomy of Angiosperms and Plant Community (2013 Pattern) (Semester-I) (Paper - I) (Regular)

Time : 2 Hours]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) All questions carry equal mark.
- 3) Figures to the right indicate full marks.
- 4) Neat diagrams must be drawn wherever necessory.

**Q1)** Attempt all of the following:

- a) What is phylogenetic system of classification?
- b) Give any two adaptations of xerophytes.
- c) Define ecology.
- d) Define food chain.
- e) Give botanical name of any one plant of family Euphorbiaceae having economic importance.
- f) Define monograph.
- g) Write the type of fruit of family Asclepiadaceae.
- h) Give two examples of source of data from morphology.
- i) Write two advantages of e-herbarium.
- j) What is generic name?

**Q2)** Answer any two of the following:

- a) Give merits and limitations of Carl Linnaeus System of classification.
- b) Explain embryology as a source of data for systematics.
- c) Give advantages of Binomial nomenclature.

.

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Neat diagrams must be drawn wherever necessary.

*Q1*) Answer the following.

- What is active absorption of water? a)
- Define imbibition. b)
- Enlist various types of transpiration. c)
- Who proposed transpiration pull theory? d)
- Define photoperiodism. e)
- What are antitranspirants? f)
- **g**) Give any two names of eminent plant physiologists in India.
- Enlist any two methods of breaking seed dormancy. h)
- What is denitrification? i)
- Define grand period of growth. j)

**Q2)** Answer any two of the following:

- Describe the role of water in plants. a)
- Explain the different types of seed dormancy. b)
- c) Describe practical applications of cytokinins.

[Total No. of Pages : 2

[10]

[10]

[Max. Marks: 40

**SEAT No. :** 

*Q3*) Write notes on (Any two)

- Guttation a)
- Vernalization b)
- Factors affecting ascent of sap. c)
- Q4) Define osmosis. Write its mechanism and add a note on its significance in plants. [10]

#### OR

What is nitrogen fixation? Explain in detail symbiotic nitrogen fixation.

## [5522]-109 S.Y. B.Sc. ZOOLOGY

## ZY-211: Animal Systematics and Diversity-III (Paper-I) (2013-Pattern) (Semester- I)

Time : 2 Hours]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Neat diagrams must be drawn wherever necessary.
- 3) Figures to the right indicate full marks.

*Q1*) Attempt the following:

- a) Write any two distinguishing characters of class cephalopoda
- b) Give any two examples of class pelecypoda.
- c) What is ametabolous development?
- d) What is mimicly in insects?
- e) What is torsion in mollusca?
- f) Write any two distinguishing characters of class Gastropoda.
- g) What is sinistral shell?
- h) What is the function of pedicellariae in starfish?
- i) What is the function of gonads in starfish?
- j) Write any two examples of class Insecta.

*Q2*) Write short notes on (Any Two) :

- a) Autotomy and regeneration in starfish
- b) Distinguishing characters of class crustacea
- c) Glochidium larva in mollusca

*P.T.O.*

## **STATISTICS** ST - 211 : Discrete Probability Distributions, **Time series and R-Software** (Paper -I) (2013 Pattern) (Semester - I)

Time : 2 Hours/

Instructions to the candidates:

- All questions are compulsory. 1)
- Figures to the right indicate full marks. 2)
- Use of calculator and statistical tables is allowed. 3)
- Symbols and abbreviations have their usual meaning. 4)

**Q1**) Attempt each of the following.

- Choose the correct alternative in each of the following: [1 each] A)
  - If  $X \rightarrow NB(3, 0.8)$ , then first cumulant is equal to a)

i)	0.75	ii)	12
iii)	0.94	iv)	60

- Suppose  $X = (X_1, X_2, X_3) \rightarrow MD (4, 0.5, 0.25, 0.25)$  then **b**)  $E(X_1, X_2)$  is
  - i) -1.50.667 ii)
  - iv) -0.667iii) 1.5
- In time series analysis, method of simple averages is used to compute c)
  - i) Trend ii) Seasonal indices
  - Cyclical variations iv) irregular variations iii)

*P.T.O.* 

#### [Max. Marks:40

- B) State whether each of the following statements is True or False: [1 each]
  - a) Moving averages can give estimate of trend for future.
  - b) Sea() function is used to generate a vector of elements in sequence.
  - c) Negative binomial distribution is always positively skewed.
- C) State four phases of business cycle. [1]
- D) State R name of binomial and poisson distributions. [1]
- E) Give any one real life situation where negative binomial distribution is applicable. [1]
- F) Define truncated poisson distribution, truncated at zero. [1]

5

- **Q2)** Attempt any two of the following.
  - a) If  $(X_1, X_2, X_3)$  is a trinomial random variable (r. v.) with  $(n, p_1, p_2, p_3)$  as parameters then obtain conditional distribution of  $X_1$  given  $X_2 = x_2$ .
  - b) State components of the time series and explain any one of them.
  - c) At a traffic checkpost 20% of vehicles are found to be out of state. What is the probability that on a particular day 10<sup>th</sup> vehicle will be found to be 3<sup>rd</sup> vehicle which is out of state?
- Q3) Attempt any two of the following
  - a) If  $X_{T}$  is a binomial r. v. with n = 5 and p = 0.4, truncated at zero.

Find i)  $P[X_T = 4]$ 

- ii)  $P[X_T \le 2]$
- b) Describe ratio to moving average method for estimation of seasonal indices in time series.

[5522]-113

#### 2

# [5 each]

[5 each]

c) Give the output of the following:

i) 
$$> x = 2 : 5$$
  
 $> n = length (x)$   
 $> n$   
ii)  $> x = c (1, 5, 1, 2, 3, 7, 1, 2)$   
 $> unique (x)$ 

$$v) > x = rep (6, 4)$$
$$> x$$

Q4) Attempt any one of the following.

a) i) For the following time series fit exponential smoothing with damping factor 0.9 ( $= 1 - \alpha$ ). [5]

t:	1	2	3	4	5	6	7	8	9	10
Y <sub>t</sub> :	31	37	39	41	41	39	33	29	27	29

ii) If  $(X_1, X_2, X_3) \rightarrow MD$  (n, p<sub>1</sub>, p<sub>2</sub>, p<sub>3</sub>), show that the multiple correlation coefficient  $R_{1.23} = 1$ . [5]

ii) If 
$$X = (X_1, X_2, X_3) \rightarrow MD (6, 0.4, 0.2, 0.4),$$
  
Find: 1)  $P [X_1 = 2, X_2 = 2, X_3 = 2]$   
2)  $P [X_1 + X_2 = 3]$  [4]

iii) If  $X_T$  is a poisson r. v. with  $\lambda = 2$  truncated at zero then find E ( $X_T$ ) and var ( $X_T$ ) [2]

## ST - 212 : Continuous Probability Distributions - I (Paper -II) (2013 Pattern) (Semester - I)

Time : 2 Hours]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Use of calculator and statistical table is allowed.
- 4) Symbols and abbreviations have their usual meaning.

Q1) Attempt each of the following.

A) Choose the correct alternative in each of the following: [1 each]

- a) If F(x) is distribution function and  $x_2 < x_1$  then
  - i)  $F(x_2) < F(x_1)$  ii)  $F(x_2) \le F(x_1)$
  - iii)  $F(x_2) > F(x_1)$  iv)  $F(x_2) \ge F(x_1)$
- b) A continuous random variable (r. v.) (x, y) has joint p. d. f. f(x, y). If x and y are independent then f(y | x = x) is
  - i) f(x) ii) f(y)

iii) 
$$f(x) f(y)$$
 iv)  $\frac{f(y)}{f(x)}$ 

c) If 
$$x \to U[-1, 1]$$
 then E (x) is

- i) 1 ii) 2
- iii) 0 iv)  $\frac{1}{2}$

*P.T.O.* 

[Max. Marks :40
- b) State whether the given statement is true or false in each of the following: [1 each]
  - i) If  $x \rightarrow N(1, 1)$  then  $\mu_3$  is 0.
  - ii) If x is continuous r. v. with probability density function (p. d. f.) f(x) then moment generating function (m. g. f.) of x + a is :  $M_{x+a}(t) = M_x(a+t).$
  - iii) Exponential distribution is symmetric.
- c) State mean and variance of  $\mathfrak{g}(\alpha, \lambda)$ . [1]
- d) Suppose x is continuous r. v. with p. d. f.

f(x) = K(1-x); 0 < x < 1

= 0 ; otherwise

Find the value of K

e) Define joint probability distribution function of a continuous bivariate
 r. v. [1]

2.5+

[1]

[5 each]

- f) If  $x \rightarrow U[a, b]$  then find median of x. [1]
- **Q2)** Attempt any two of the following.
  - a) The joint p. d. f. of r. v. (x, y) is

$$f(x, y) = 4x (1-y); 0 < x, y < 1$$

- = 0 ; otherwise
- i) Find marginal p. d. f. of X and Y.
- ii) Find conditional p. d. f. of Y given X = x.

[5522]-114

b) A r. v. x has p. d. f.

 $f(x) = 3 (1-x)^2; 0 < x < 1$ 

=0 ; otherwise

Find i) E(x).

ii) p. d. f. of 
$$\frac{X}{1-X}$$

c) State and prove additive property of two independent normal variates.

#### Q3) Attempt any two of the following

[5 each]

a) Suppose x is a r. v. with distribution function.

F(x) = 0 
$$x < 2$$
  
=  $\frac{x-2}{4}$   $2 \le x \le 6$   
= 1  $x > 6$   
If A = {x | 1 < x < 4}, B = {x | 2 < x < 5}  
then find P(A \cord B), P(A \cord B^1).

b) If X is a r. v. with m. g. f.

 $M_{\chi}(t) = e^{2t+2t^2}$  then

- i) Identify distribution of r. v. X
- ii) Find P [2 < X < 4].
- c) State and prove lack of memory property of exponential distribution and interpret it.

[5522]-114

Q4) Attempt any one of the following.

a)

i) Suppose X, Y are independent r. v.'s. with p. d. f. 's as  $f(x) = 3e^{-3x}$ ; x > 0 = 0; otherwise  $f(y) = 3e^{-3y}$ ; y > 0 = 0; otherwise Find probability distributions of X + Y and  $\frac{X}{Y}$ . [7]

- b) i) Check whether X, Y are independent r. v. if the joint p. d. f. is f(x, y) = 4xy; 0 < x, y < 1 = 0; otherwise Also find E (X + Y) and E (XY). [4]
  - ii) Explain the methods for obtaining central moments by using cymulant generating function. [4]
  - iii) State central limit theorem for independent and identically distributed r. v. 's with finite variance. [2]

Time : 2 Hours [Max. Marks: 40 Instructions to the candidates. All the questions are compulsory. 1) 2) Neat diagrams must be drawn wherever necessary. 3) Figures to the right indicate full marks. Use of non programmable calculator is allowed. *4*) **Q1**) Attempt All of the following. Define multistage amplifier. [1] a) List the basic building blocks of op Amp. b) [1] What are the two requirement of oscillation? c) [1] Define CMRR. d) [1] 'Basically all amplifiers are power amplifiers' comment. e) [2] f) 'Common mode rejection is improved in an instrumentation amplifier' comment [2] In negative feedback system, if feedback gain AF is 50 and amplifier g) gain A=60, find the feedback factor. [2] In an op amp integrator circuit c=0.1  $\mu$ f and R = 1 m $\Omega$ , find its integrated h) gain. [2] **Q2**) Attempt any two of the following. Draw the block diagram of voltage series and current shunt feedback. a) [4] Show that efficiency of class A power amplifier with transformer coupled b) load is 50% [4] Explain in detail, designing steps for single stage class A audio amplifier c) [4]

*P.T.O.* 

- **Q3)** Attempt any two of the following.
  - a) What do you mean by negative feedback? derive the expression for gain? [4]
  - b) Explain with circuit diagram, direct coupled amplifier. [4]
  - c) Draw the circuit diagram of voltage to current converter. Derive the expression for output current. [4]
- **Q4)** Attempt all of the following.
  - a) Draw and explain class- B push pull amplifier and show that collector efficiency for class-B power amplifier is 78.5% [6]
  - b) Draw the diagram of op amp as a differentiation circuit derive the expression for its output voltage. [6]

#### OR

- **Q5)** Attempt all of the following.
  - a) The phase shift oscillator circuit use 5 the resistor  $1 \text{ m } \Omega$  and capacitor of  $68 \mu \text{f}$  calculate frequency of oscillation [4]
  - b) Calculate the value of bypass capacitor for designing single stage RC coupled amplifier, its lower cutoff frequency is 400 Hz.

Assume:  $RE=180\Omega$ 

[4]

c) A power transister dissipate 4 watt energy If Tj is 90°c, find ambient temperature at which it can be operated safely.(Given  $v = 10^{\circ}$ c/w) [4]

## (2013 Pattern) (Semester - I) (Paper - II) (Regular)

Time	e : 2	Hours] [Max. Marks :-	[Max. Marks :40	
Instr	ucti	ons to the candidates:		
	<i>1</i> )	All questions are compulsory.		
	2)	Neat diagrams must be drawn wherever necessary.		
	3)	Figures to the right indicate full marks.		
<b>Q1</b> )	) Answer all of the following:			
	a)	What do you mean by pair in K-map?[1]	[]	
	b)	What is totaliser?	[]	
	c)	Write excitation table of T-flip-flop. [2	[]	
	d)	Define accuracy in DAC. [2	[]	
	e)	Draw K-map for following equation. [2	2]	
		$AB\overline{C} + ABC + A\overline{B}\overline{C} + A\overline{B}C$		
	f)	"Non-multiplexed display system draws larger current from powersupply". Comment.	er 2]	
	g)	"R - 2R ladder is better than resistive divider method in DAC". Commer	ıt. 2]	
	h)	Draw the state diagram of mod-5 counter and write its state table. [2	2]	
Q2)	?) Attempt any two of the following:			
	a)	Draw the logic diagram of 3-bit up-down counter and explain its working.[4	<b>4</b> ]	
	b)	Explain with neat diagram counter type ADC. [4	<b>1</b> ]	
	c)	Design and implement a 4-bit binary to gray converter using K-map.	<b>1</b> ]	

- *Q3*) Attempt any two of the following:
  - a) Describe the working of tracking A to D converter with the help of block diagram. [4]
  - b) Design full adder using K-map. [4]
  - c) Draw block diagram of digital clock and explain minutes counter in detail. [4]
- *Q4*) Attempt all of the following:
  - a) Explain in detail: [6]
    i) Electromechanical relay.
    ii) Electrical relay.
    b) Design 3 bit synchronous binary counter using JK flip-flop. [6]

OR

Attempt all of the following:

- a) Find the output voltage from 4-bit R-2R ladder network for digital input 1010 given input voltage levels are 0=0volt and 1 = 5 volt. [4]
- b) Design a counter using JK flip-flop for the sequence 1, 2, 3, 1, 2, 3, ---[4]
- c) What will be the output of 4-bit magnitude comparator using IC 7485, if A = 1011 and B = 1010. Draw its logic diagram. [4]

# S.Y.B.Sc. (Regular) DEFENCE AND STRATEGIC STUDIES DS-101: STUDY OF CONFLICT AND PEACE (2013 Pattern) (Paper - I) (Semester - I)

5.1

#### Time : 2 Hours]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.

**Q1)** Answer in two or Four sentences.

- a) Define war studies
- b) What do you mean by civil society?
- c) Define cultural integration
- d) Define Nation-State
- e) Define self determination
- f) Define Human Rights
- g) Define nationalism
- h) What do you mean by politics of power?

**Q2)** Answer in 8 to 10 sentences (any two)

- a) Write a note on the scope of conflict studies.
- b) Explain importance of war studies in the present context.
- c) Discuss pacific methods of conflict settlement.

[8×2=16]

[Max. Marks :40

 $[2 \times 4 = 8]$ 

*P.T.O.* 

- **Q3)** Write short notes on (any two)
  - a) Challenges to peace studies.
  - b) Contribution of Research in peace studies.
  - c) Methodology of Conflict resolution.
- **Q4)** Answer in 18 to 20 sentences (any two)

- [1×8=8]
- a) Write a note on the role of peace studies in world order.
- b) Discuss approaches to the study of conflict and peace.

#### Time : 2 Hours]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.

**Q1)** Answer in 2 to 4 sentences each.

- a) Define "Disaster".
- b) How you would like to define "Tactics".
- c) Why the study of High Altitude warfare is essential for us?
- d) Define "Logistics".
- e) State the vehicles of Desert warfare.
- f) Define "Strategy".
- g) What do you mean by "Civil Defence".
- h) Define "National Security".

**Q2)** Answer in 8 to 10 sentences (Any Two)

- a) Explain the grand strategy of shivaji.
- b) Write on "Strategy during peace".
- c) Discuss in brief concept of Military Geography.

[16]

[8]

*P.T.O.* 

- **Q3)** Write short notes on (any two)
  - Logistics problems of plain warfare. a)
  - Characteristics of Jungle warfare. b)
  - Concept of Tactics. c)

**Q4)** Answer in 16 to 20 sentences (Any one)

- Explain the implications of war on "Environment". a)
- Highlight on various resources of logistics. b)

### (Semester - I)

### Time : 2 Hours]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.

**Q1)** Answer in 2 to 4 sentences each:

- a) Define "Contemporary strategy"
- b) Define "War".
- c) What do you mean by "Nuclear Deferrence"?
- d) Define 'National security'.
- e) State any two components of National security strategy.
- f) What is conventional War?
- g) What do you understand by C.B.M.?
- h) Define 'strategy''.

**Q2)** Answer in 8 to 10 sentences (Any Two):

- a) Explain the concept of "Flexible Response".
- b) Write in brief "Operation Shakti of India -1998"
- c) Explain in brief the concept of Nuclear Doctrine.

[16]

[8]

- **Q3)** Write short notes on (Any Two):
  - P.N.E. of India 1974. a)
  - Massive Retaliation. b)
  - Concept of "strategic thinking" c)
- **Q4)** Answer in 16 to 20 sentences (Any one):

[8]

- Explain theory of Nuclear Deferrence with example. a)
- Write an essay on "Judias" Nuclear policy". b)

# [5522]-130 S.Y. B.Sc. (Regular) ENGLISH(Optional) Textbook : Literary Vistas (2013 Pattern) (Semester-I)

Time : 2 Hours]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.

### Q1) a) Attempt any one of the following in about 100 words each: [05]

- i) Comment on the differences between a planet and a star?
- ii) Explain the role of scientific progress in the development of human science?
- b) Attempt any one of the following in about 100 words each: [05]
  - i) What basic facts does C.Jones describe about our planetary system in 'The Sun, the planets and the stars'?
  - ii) What are the problems that the children, who are at the mercy of five to six hours of television a day, face when they move into the real world?

#### Q2) a) Attempt any one of the following in about 100 words each: [05]

- i) Purdah is criticized as 'oppression of women'. How does the poem argue this point?
- ii) What advice the poem 'A Psalm of Life' conclude with?
- b) Attempt any one of the following in about 100 words each: [05]
  - i) 'Shame and sin become a part of a girl's identity along with the purdah'. How does the poem 'Purdah' build this idea?
  - ii) What, according H.W.Longfellow, are the virtues we should incorporate to live everyday meaningfully?

*P.T.O.* 

[Max. Marks :40

[Total No. of Pages :3

SEAT No. :

- *Q3*) Attempt any five of the following.
  - a) Complete the following sentences with an appropriate word chosen from those in brackets.
    - i) Everyone \_\_\_\_\_ the manager attended the function.(except/accept)
    - ii) My friend has won many\_\_\_\_\_in quiz-competitions.(awards/rewards)
  - b) Match the words from A with their synonyms in B.

А	В
i) conceal	peaceful
ii) finish	hide
iii) futile	complete
iv) calm	useless

- c) Choose the right combination of the words.
  - i) press an icon/click on an icon
  - ii) background knowledge/earlier knowledge
- d) Pick out the word that is the closest antonym of the underlined word.
  - i) <u>diffident</u>: difficult, confident, torment
  - ii) <u>ambiguity</u>: clarity, guilt, liveliness
- e) Differentiate between the following pairs of words.
  - i) practical, practicable
  - ii) childish, childlike
- f) Add prefixes or suffixes to the words in brackets and rewrite the sentences.
  - i) It is a very\_\_\_\_day. (wind)
  - ii) Could you\_\_\_\_\_the child's shoe laces please? (tie)
- Q4) Attempt any ten of the following.
  - a) She is \_\_\_\_\_(give) her son a present. It is a mobile phone that he wanted.
     (Use the correct form of the verb given in the bracket)
  - b) Kalidas (be) a great poet. He 2000 years ago.(live)
     (Use the correct form of the verb given in the bracket)

[5522]-130

[10]

[10]

- c) Sitting under the tree, the family enjoyed their picnic lunch.(Change into a compound sentence)
- d) The girl sent me an email, but it bounced.

(Change into a complex sentence)

e) He was so tired that he could not walk any longer.

(Change into a simple sentence)

f) What an interesting game we had!

(Change into a declarative sentence)

g) It is a very interesting story.

(Change into a exclamatory sentence)

h) Could you open the door, please?

(Change into an imperative sentence)

i) I cannot help you.

(Change into an affirmative sentence)

- j) The Moon can be seen through the clouds.(Change into a negative sentence)
- k) The dogs have not been fed.

(Change the voice)

 The nurse said to the patient, "Has the pain become worse"? (Change into reported speech)

## S.Y. B.Sc. (Vocational)

#### **BIOTECHNOLOGY-I**

## Voc-Biotech-211: Cell & Molecular Biology and Microbial Genetics (2013 Pattern) (Semester - I) (Paper- I)

Time : 2 Hours]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) All questions carry equal marks.
- 3) Neat diagrams must be drawn wherever necessary.
- 4) Figures to the right indicate full marks.

Q1) Answer each of the following in 1-2 lines:

- a) Define: Autocrine signaling.
- b) What is  $Na^+/k^+$  transport?
- c) State the role of desmosome.
- d) What are proteoglycans?
- e) How  $F^+$  strain is formed during conjugation.
- f) What is bidirectional replication?
- g) Define: SOS repair.
- h) Give the role of  $H_1$ . Histone protein in nucleosome.
- i) What is specialised transduction?
- j) Enlist two examples of cell signalling molecules.

#### *Q2*) Write short notes on <u>any two</u> of the following:

- a) Conjugation.
- b) N and O glycosylation.
- c) Cell differentiation.

*P.T.O*.

[Max. Marks :40

[Total No. of Pages : 2

[10]

[10]

- **Q3)** Attempt any two of the following:
  - What are mobile elements? Explain with suitable example. a)
  - Explain structure and function of endoplasmic reticulum. b)
  - What is gene? Explain the prokaryotic gene structure. c)
- *Q4*) Explain the process of transcritpion in prokaryotes in detail. [10]

Compare and contrast prokaryotic and eukaryotic replication.

## S.Y. B.Sc. (Vocational -I) (Regular) PHOTOGRAPHY AND AUDIO-VISUAL PRODUCTION - I Still Photography, Processing & Printing (2013 Pattern) (Semester - I) (Paper - III)

Time : 2 Hours]

Instructions to the candidates:

- All questions are compulsory. **1**)
- 2) Draw neat and labeled diagrams wherever necessary.
- Figures to the right indicate full marks. 3)

*Q1*) Answer the following in short:

- Mention the important attributes of a subject that are useful for 'lighting' a) it.
- State the law of transmission and absorption of light. b)
- Explain the significance of the front elements of a camera lens. c)
- What is the 'hyper focal distance'? Which factors affect it? d)
- e) Discuss the importance of the 'histogram' in digital photography.
- Define the angle of view of a camera lens. Calculate the angle of view of f) a lens with a focal length of 100 mm on a full frame DSLR camera.
- The guide number of a flash light is 56, what does it mean? g)
- Telephoto lenses are generally slower. Explain. h)
- Q2) Attempt ANY TWO of the following:
  - Discuss the different artificial light sources used in photography. Give a) one example and use of each.
  - Discuss what is 'unwanted light' in photography. Give suitable examples. b)
  - Compare the features of a telephoto lens and a wide angle lens. c)

**[16]** 

[8]

- *Q3*) Write notes on ANY TWO of the following:
  - a) Metering patterns of a TTL exposure meter.
  - b) Use of polarizing filter in photography.
  - c) People photography.
- **Q4**) Answer ANY ONE of the following:
  - a) Give suitable examples and discuss how light is important in photography.
  - b) Draw a suitable diagram and discuss the standard three point lighting set-up used for studio portrait Explain the importance of each light used in this set-up.

## S.Y. B.Sc. (Vocational) ELECTRONIC EQUIPMENT MAINTENANCE - I EEM-211: Troubleshooting Electronic Equipment - A (2013 Pattern) (Semester - I) (Paper - I)

Time	e : 2	Hours]	[Max. Marks :40
Instr	ucti	ons to the candidates:	
	1)	All questions are compulsory.	
	2)	Figures to the right indicate full marks.	
	3)	Use of log table/calculator is allowed.	
<b>Q1</b> )	An	swer the following:	
	a)	What is block diagram?	[1]
	b)	State the use of wiring diagram.	[1]
	c)	What is circuit diagram?	[1]
	d)	State the name of tools required for Dis-assembly.	[1]
	e)	Comment - cause of equipment failure is a poor design.	[2]
	f)	Comment - careless storage causes fault in a equipment	. [2]
	g)	State the effect of in appropriate operating conditions operation.	s on equipment [2]
	h)	State the importance of grounding system.	[2]
Q2)	An	swer any two:	[2×4=8]
	a) State nature of faults. Discuss fault location procedure		-
	b)	Discuss various fault finding aids.	
	c)	Explain faults in fixed resistor.	

- **Q3**) Answer any two:
  - a) Discuss testing procedure of LDR and thermistor.
  - b) Explain faults in capacitor.
  - c) Explain the procedure of testing & measurement of inductance.
- *Q4*) Answer the following:
  - a) Discuss causes of failure in semiconductor devices.
  - b) Explain test procedure of Diode and transistor.

#### OR

Answer the following:

[2×6=12]

[2×6=12]

- a) Explain any three types of semiconductor devices.
- b) Discuss fault diagnosis in Op-Amp circuits.

**P345** 

#### [5522]-140

## S.Y. B.Sc. (Vocational) **COMPUTER HARDWARE & NETWORK ADMINISTRATION Microprocessor & Interfacing Techniques** (2013 Pattern) (Semester - I) (Paper - I)

Instructions to the candidates:

Time : 2 Hours/

- 1) All questions are compulsory.
- Figures to the right indicate full marks. 2)

Attempt the following: *Q1*) a)

- Define Accuracy of DAC. i)
- What is HDMI? ii)
- iii) What is the size of address bus and data bus of 8086 Microprocessor.
- State different types of port available in a computer. iv)
- Attempt the following: **b**)
  - What is DRAM? i)
  - ii) What is sensor? List any two temperature sensor you know.
  - iii) What is Cache memory?
  - What is USB? List any two devices that support USB. iv)

**Q2**) Attempt any two of the following:

- What is interrupt? Explain software interrupts in brief. a)
- What is DAC? Explain working of any one type of DAC. b)
- Write a short note on i5 processor. c)

[Total No. of Pages : 2

 $[4 \times 1 = 4]$ 

 $[4 \times 2 = 8]$ 

 $[2 \times 4 = 8]$ 

[Max. Marks :40

**SEAT No. :** 

- *Q3*) Attempt any two of the following:
  - a) List and explain in breif computer based design and development tools.
  - b) List various BUS architecutres you know. Explain features of any one of the BUS.
  - c) Explain DMA Controller operation with a neat diagram.
- *Q4*) Attempt any two of the following:

a)

- List Intel and Non-Intel processors. Explain features of Pentium and i3 processor in brief.
- b) What is ADC? List different types of ADC. Explain working of any one.
- c) What is a matrix keyboard? Draw schematic diagram to interface matrix keyboard with microprocessor and explain its working.

[2×6=12]

## S.Y. B.Sc. (Vocational) SEED TECHNOLOGY VOC-SETE-211: Hybrid Seed Production (2013 Pattern) (Semester - I) (Paper - I)

Sil

#### *Time : 2 Hours]*

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Draw neat and labeled diagrams wherever necessary.

#### *Q1*) Attempt the following:

- a) Give the types of Apomixis.
- b) Define Genetic male sterility.
- c) What is self incompatibility?
- d) Define Roughing.
- e) What is Isolation?
- f) What is a variety?
- g) Define emasculation.
- h) What is the isolation distance required for Jowar hybrids?
- i) What is stigma receptivity?
- j) Enlist types of placentations.

*Q2*) Attempt any two of the following:

- a) Describe cytoplasmic male sterility.
- b) Give the commercial utilization of heterosis.
- c) Comment on structure of stamen.

[10×1=10]

[Max. Marks :40

#### [2×5=10]

*P.T.O.* 

*Q3*) Write notes on (Any two):

[2×5=10]

- Significance of Apomires. a)
- b) Compact area approach.
- Gametocides. c)
- Q4) Give detail procedure for hybrid seed production in cotton. [10]

Give detail procedure for hybrid seed production in Arachis hypogea.

## S.Y. B.Sc. (Vocational) INDUSTRIAL MICROBIOLOGY VOC-IND-MIC-211: Bioreactors - Designs and Operation (2013 Pattern) (Theory) (Semester - I) (Paper - I)

*Time : 2 Hours]* 

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) All questions carry equal marks.
- 4) Draw neat labeled diagrams wherever necessary.
- 5) Use of scientific calculators is allowed.

Q1) Answer each sub-question in one or two lines:

- a) State two disadvantages of Batch culture.
- b) Define Sterilization.
- c) State two methods of measuring biomass.
- d) What is Chemostat?
- e) State one feature of Rushton turbine.
- f) Sparger cannot be used for aeration and agitation both. State T/F.
- g) Define Immobilization.
- h) What is SIP?
- i) How would you sterilize amino acids?
- j) How do you sterilize vitamins?

*Q2*) Answer any two of the following:

- a) Draw a neat labelled diagram of CSTR.
- b) Explain process of fed batch culture with suitable example.
- c) Explain role of Del factor in designing sterilization regime.

*P.T.O.* 

[10]

- **Q3**) Write a short note on any two of the following:
  - Plug flow reactor. a)
  - Types of impellors. b)
  - Dissolved Oxygen sensors. c)

Q4) Answer any one of the following:

[10]

[10]

- Discuss in details- Time-course of fermentation with suitable example. a)
- Describe on-line, in-line and offline data acquisition. b)

## S.Y. B.Sc. (Vocational) BIOTECHNOLOGY -II VOC-Biotech-212: Recombinant DNA Technology (2013 Pattern) (Semester - I) (Paper - II)

Time : 2 Hours]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) All questions carry equal marks.
- 3) Neat diagrams must be drawn wherever necessary.
- 4) Figures to the right indicate full marks.

Q1) Answer each of the following in 1-2 lines:

- a) What are plasmids?
- b) Give any two examples of shuttle vectors.
- c) Name the enzyme produced by Lac Z' gene.
- d) What are restriction enzymes?
- e) Give the function of Taq polymerase.
- f) What is transfection?
- g) Name two molecules used for non-radioactive labelling of nucleic acids.
- h) What is Western blotting?
- i) What are DNA modifying enzymes?
- j) Why Type-II restriction endonucleases are used for gene cloning?

#### **Q2)** Write short notes on any two of the following:

- a) BAC vector.
- b) Site directed mutagenesis.
- c) Southern blotting.

[10]

[10]

- **Q3)** Answer any two of the following:
  - Describe the Sanger's method of DNA sequencing. a)
  - Explain transformation as a method of introducing r-DNA into the host b) cell.
  - Give the applications of PCR. c)
- Q4) What is genomics? Describe various types of genomics and add a note on their applications [10]

#### OR

Describe the lytic cycle and lysogenic cycle of bacteriophage in detail.

SEAT No. :

[Total No. of Pages : 2

## S. Y. B. Sc. (Vocational) PHOTOGRAPHY AND AUDIO-VISUAL PRODUCTION - II Fundamentals of Acoustics and Sound for Media (2013 Pattern) (Paper - IV) (Semester - I)

Time : 2 Hours] [Max. Marks :40 Instructions to the candidates: 1) All questions are compulsory. Draw neat and labeled diagrams wherever necessary. 2) 3) Figures to the right indicate full marks. *Q1*) Attempt All of the following. What is an anechoic chamber? a) [2] Mention four basic requirements of an auditorium? b) [2] Define: Reverberation. c) [2] What is microphone? Mention any two types of special microphones. [2] d) Compare the frequency response of a tweeter and a woofer. [2] e)

Q2) Attempt ANY TWO of the following:

- a) With the help of a neat sketch, explain the functioning of a crystal microphone. Explain why ceramic crystal is more suitable than Rochelle salt crystal.
- b) Sound intensity at 1 meter from a loudspeaker is 400 mW/m<sup>2</sup>. The audio power fed to the loudspeaker is 10 W. Calculate the efficiency of the loudspeaker.
- c) Calculate the reverberation time for an auditorium of 1000 cubic meters having total absorption equal to 230 Sabine. [5]

*P.T.O.* 

- **Q3)** Attempt ANY TWO of the following.
  - a) Design a crossover network to give 12 dB per octave attenuation for tweeter and woofer for critical frequency of 1 kHz. Loudspeaker resistance is 16 Ω.
  - b) Calculate power gain in dB if input power of 200 mW gives output power of 2 W. [5]
  - c) Find the wavelength of sound of 1000 Hz presuming its velocity to be 344 m/s. [5]
- **Q4)** Attmpt ANY TWO of the following.
  - a) Draw a neat labeled block diagram to explain the construction and working of a magnetic sound recording system. [5]
  - b) With the help of a neat sketch, explain the functioning of a moving coil cone type loudspeaker. Explain why it is called direct radiating type loudspeaker. [5]
  - c) State five characteristics of loudspeaker and explain them in brief. [5]

Time :2 Hours] Instructions to the candidates:

- 1) All questions are compulsory.
- Figures to the right indicate full marks. 2)
- *Q1*) a) Attempt the following.
  - What is Corrosion? i)
  - ii) What do you mean by EMI?
  - iii) List various components on motherboard.
  - What is the importance of fan in your PC? iv)

#### Attempt the following: b)

- i) What is Booting?
- State common problems that may arise while using serial ports. ii)
- What is CDROM? List any two problems related to CDROM. iii)
- List various diagnostic and utility programs available in PC. iv)

**Q2)** Attempt any two of the following:

- Explain the effect of heat and cold as contributors to system failures? a)
- b) Explain in brief the preventive measures for disk drive failure.
- Explain backup and recovery procedure in brief. c)

 $[4 \times 2 = 8]$ 

 $[4 \times 1 = 4]$ 

[Max. Marks :40

 $[2 \times 4 = 8]$ 

- Q3) Attempt any two of the following.
  - a) Write a short note on preventive maintenance of PC.
  - b) Explain keyboard and mouse problems and the measures for their troubleshooting.
  - c) Write a short note on repair generated failure.

\* \* \*

**Q4)** Attempt any two of the following.

[2×6=12]

- a) What is SMPS? What are types of SMPS. Explain in brief the preventive maintenance of UPS and SMPS of a PC.
- b) List various electronic equipments used in troubleshooting. State and explain steps for successful troubleshooting of computer.
- c) State various display adaptors and there functions. Explain display related problems in brief.

*Time : 2 Hours]* 

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Draw neat and labeled diagrams wherever necessary.

**Q1)** Attempt the following.

- a) Define seed vigour.
- b) Name the equipment used for testing the moisture content of seed?

5.1

- c) What is reporting of results?
- d) Name the methods employed in testing of seed germination.
- e) Write any two principles of seed sampling?
- f) Give the importance of central seed Testing Laboratory.
- g) Write the methods used for testing seed moisture content?
- h) How guard samples are stored?
- i) What is seed testing?
- j) What is heterogeneity test?

[Max. Marks :40

[Total No. of Pages : 2

 $[10 \times 1 = 10]$ 

# *Q2*) Attempt any two of the following:

- a) Write on state Seed Testing Laboratory
- b) Discuss on moisture meter
- c) Comment on physical purity work board.

*Q3)* Write notes on (Any two):

- a) Layout of Seed Testing Laboratory.
- b) General principles of seed sampling
- c) Seed vigour testing
- **Q4)** Explain the types of seed samples?

*Time : 2 Hours]* 

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) All questions carry equal marks.
- 4) Draw neat diagrams wherever necessary.
- 5) Use of scientific calculators is allowed.

Q1) Answer each sub-question in one or two lines:

- a) Define 'Strain Improvement'.
- b) Enlist any two growth factors used in fermentation process.
- c) Define precursors.
- d) List the parameters to be scaled up in a fermentaiton process.
- e) What is secondary screening?
- f) Enlist any two antifoam agents used in fermentation process.
- g) Name any two industrially important bacteria.
- h) Enlist any two microbial preservation techniques.
- i) Define Auxotrophic mutant.
- j) Define Del Factor.

**Q2)** Answer any two of the following:

- a) Diagrammatically represent modes of feedback repression.
- b) Give importance of carbon source in industrial fermentation process with appropriate examples.
- c) Describe agar overlay method and its importance.

[Max. Marks :40

[10]

[10]

- **Q3**) Write a short note on any two of the following:
  - Write a short note on response surface methodology. a)
  - Write importance of recombinant DNA technology in strain improvement. b)
  - c) Explain Function based targeted screening.
- **Q4)** Answer any one of the following:
  - gn , cation , cece Explain how Plackett Burman design can be used for the optimization of a) parameters in large scale fermentation process.
  - Explain scale up for batch sterilization of media at industrial scale. **b**)
