# DSE - 1A : MT - 351 : Metric Spaces

### (CBCS 2019 Pattern) (Semester - V) (35111)

Time : 2 Hours]

[Max. Marks: 35

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.

**Q1**) Attempt any five of the following.

- Does  $d(x, y) = \sqrt{|x + y|}, \forall x, y \in \mathbb{R}$ , define a metric on  $\mathbb{R}$ ? Justify. a)
- Find the interior of following subsets of  $\mathbb{R}$  with usual metric. b) i) Q ii)  $[0,1) \cup (1,2]$
- Find the limit points of (0, 1) and [0, 1] in  $\mathbb{R}$ . c)
- Let  $(\mathbb{R}, d)$  be a discrete metric space and  $x \in \mathbb{R}$ . Find B $(x, \frac{1}{2})$  and B(x, 3). d)
- Show that every Cauchy sequence in a discrete metric space is convergent. e)
- Give an example of closed subset of  $\mathbb{R}$  with usual metric which is neither f) compact nor connected.
- Find all compact subsets of discrete metric space  $(\mathbb{R},d)$ . g)
- *Q2*) a) Attempt any one of the following.
  - Prove that arbitrary intersection of closed sets in metric space (X, d)i) is closed.
  - Let (X, d) be a metric space. Show that any convergent sequence ii) in (X, d) is a Cauchy sequence.
  - Attempt any one of the following. b)
    - Let (X, d) be a metric space. i) Define  $\delta(x, y) = \min\{1, d(x, y)\}, \forall x, y \in X \text{ b show that } \delta \text{ is a metric}$ on X.
    - Let X be a metric space, then show that  $A^{\circ}$  is the lergest open set ii) contained in A.

*P.T.O.*

**SEAT No. :** 

[Total No. of Pages : 2

[5]

- Q3) a) Attempt any one of the following.
  - i) Prove that identity function on a metric space (X, d) is continuous.
  - ii) Let X, Y be metric spaces. Show that a map  $f: X \to Y$  is continuous

if for every open set  $V \subseteq Y$ , its inverse image  $f^{-1}(V)$  is open in X.

- b) Attempt any one of the following.
  - i) If  $f: X \to Y$  is continuous and onto, then show that a map  $g: Y \to Z$  is open if  $g \circ f$  is open.
  - ii) Let (X, d) be metric space and let A, B ⊂ X be compact subsets of X. Show that A∪B is compact.
- *Q4*) a) Attempt any one of the following.
  - i) Show that continuous image of a compact metric space is compact.
  - ii) Let A and B be two connected subsets of X such that  $A \cap B \neq \phi$ . Then prove that  $A \cup B$  is connected.
  - b) Attempt any one of the following. [5]
    - i) Show that a discrete metric space with more than one point is not connected.
    - ii) Let (X, d) be a compact metric space, show that a closed subset of X is compact.

Time : 2 Hours]

P4843

[Max. Marks : 35

[5]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indiacte full marks.
- *Q1*) Attempt any five of the following.
  - a) Prove that  $A \Rightarrow B$  is logically equivalent to  $\sim (A \land (\sim B))$
  - b) Show that the function f(x) = 3x + 2 is one to one.
  - c) Define cauchy sequence of real numbers.
  - d) Find limit superior of  $\left\{ \sin\left(\frac{n\pi}{2}\right) \right\}_{n=1}^{\infty}$ .

e) Show that the sequence  $\left\{\log\left(\frac{1}{n}\right)\right\}_{n=1}^{\infty}$  diverges to  $-\infty$ 

f) Test the convergence of the series 
$$\sum_{n=1}^{\infty} \frac{n+1}{n+2}$$
.

g) Show that the sequence  $\left\{\frac{1}{n}\right\}_{n=1}^{\infty}$  is an element of class  $l^2$ .

Q2) A) Attempt any one of the following.

- a) If S is a countable set and R is a subset of S then prove that either R is empty or R is finite or R is countable.
- b) Prove that the collection of all polynomials with integer coefficient is countable.
- B) Attempt any one of the following.
  - a) If A, B, C are sets then prove that  $C \setminus (A \cap B) = (C \setminus A) \cup (C \setminus B)$ .
  - b) Let  $\mathbb{Z}$  be set of integers and  $\mathbb{N}$  be set of natural numbers. Prove that card  $(\mathbb{Z}) = \text{card}(\mathbb{N})$ .

*P.T.O.* 

[5]

- Q3) A) Attempt any one of the following.
  - a) If  $\{S_n\}$  and  $\{t_n\}_{n=1}^{\infty}$  are sequences of real numbers and  $\lim_{n \to \infty} s_n = L, \lim_{n \to \infty} t_n = M$  then prove that  $\lim_{n \to \infty} (s_n + t_n) = L + M$ .
  - b) If  $\{S_n\}_{n=1}^{\infty}$  is a convergent sequence of real numbers then prove that  $\limsup_{n \to \infty} S_n = \lim_{n \to \infty} S_n.$
  - B) Attempt any one of the following.
    - a) Suppose  $\{S_n\}_{n=1}^{\infty}$  is a sequence of positive real numbers and 0 < x < 1. If  $S_{n+1} < xS_n (n \in \mathbb{N})$  then prove that  $\lim_{n \to \infty} S_n = 0$ .
    - b) Prove that if  $\lim_{n \to \infty} \frac{S_n}{n} = L \neq 0$  then  $\{S_n\}_{n=1}^{\infty}$  is not bounded.
- Q4) A) Attempt any one of the following. [5]
  - a) If  $\sum_{n=1}^{\infty} a_n$  is a series of nonnegative real numbers which converges to

$$A \in \mathbb{R}$$
 and  $\sum_{n=1}^{\infty} b_n$  is a rearrangement of  $\sum_{n=1}^{\infty} a_n$ , then prove that

$$\sum_{n=1}^{\infty} b_n \text{ converges to A.}$$

- b) State and prove Minkowski inequality.
- B) Attempt any one of the following.

- a) Prove that the series  $1 + \frac{1}{2!} + \frac{1}{3!} + \frac{1}{4!} + \dots$  is convergent.
- b) Show that the series
  - i)  $\sum_{n=4}^{\infty} \frac{1}{n \log n}$  is divergent.
  - ii)  $\sum_{n=4}^{\infty} \frac{1}{n(\log n)^2}$  is convergent.

[5×1=5]

[5]

- Q3) a) Attempt any one of the following.
  - i) Let G be a group and let  $a \in G$ , then prove that  $H = \{a^n / n \in \mathbb{Z}\}$  is a subgroup of G and is the smallest subgroup of G that contains a.
  - ii) Let  $\phi: G \to G'$  be a group homomorphism. Show that  $\phi$  is 1-1 if and only if ker  $\phi = \{e\}$ .
  - b) Attempt any one of the following.
    - i) List all subgroup of  $\mathbb{Z}_{45}$  and draw its subgroup diagram.

ii) Let  $\sigma = \begin{pmatrix} 1 & 2 & 3 & 4 & 5 & 6 & 7 & 8 & 9 & 10 \\ 2 & 3 & 4 & 5 & 1 & 7 & 8 & 9 & 10 & 6 \end{pmatrix}$  be a permutation in

the group  $S_{10}$ .

- 1) Write  $\sigma$  as a product of disjoint cycles.
- 2) Find order of  $\sigma$ .
- 3) Write  $\sigma$  as a product of transpositions.
- 4) State whether  $\sigma$  is odd or even.
- 5) Find an inverse of  $\sigma$ .

#### Q4) a) Attempt any one of the following.

- i) State and prove Caycley's theorem.
- ii) Show that a factor group of a cyclic group is cyclic.

#### b) Attempt any one of the following.

- i) Show that if a finite group G contains a nontrivial subgroup of index 2 in G, then G is not simple.
- ii) Show that  $\mathbb{Z}_p$  has no proper nontrivial subgroups if P is a prime number.

Time : 2 Hours]

[Max. Marks: 35

[Total No. of Pages : 2

Instructions to the candidates:

- **1**) All questions are compulsory.
- Figures to the right indicates full marks. 2)

*Q1*) Attempt any five of the following :

- Verify that  $y_1 = \cos w x$  and  $y_2 = \sin w x$  are solutions of  $y'' + w^2 y = 0$  on a)  $(-\infty, \infty)$
- Solve y'' y = 0b)
- Solve the initial value problem y'' + 6y' + 5y = 0, y(0) = 3 and c) y'(0) = -1 having general solution as  $y = c_1 e^{-x} + c_2 e^{-5x}$ .
- Find the particular integral of  $(D^2 + 4) y = \sin 3 x$ . d)
- Classify all the singular points in the finite plane of the differential equation e)  $(x^2 + 4) y'' - 6xy' + 3y = 0.$
- Find a power series solution of the differential equation y' + y = 0. f)
- Show that  $x = e^{-t}$ ,  $y = -e^{-t}$  are solutions of the homogeneous system **g**)  $\frac{dx}{dt} = x + 2y, \frac{dy}{dt} = 3x + 2y.$
- Attempt any one of the following : *O2*) a)

With usual notation prove that  $\frac{1}{f(D)}e^{ax} = \frac{x'}{r!\phi(a)}e^{ax}$  where i)  $f(D) = (D - a)^r \phi(D), \phi(a) \neq 0.$ 

Explain the method of reduction of order method to solve the ii) differential equation  $y'' + p(x) y' + q(x) y = \mathbf{R}(x)$ .

**P.T.O.** 

[5]

[5]

**SEAT No. :** 

- b) Attempt any one of the following :
  - i) Solve the differential equation  $x^2 y'' 2xy' + 2 = 4x^2$  by using method of reduction of order where  $y_1 = x$  is solution of corresponding homogeneous equation.

[5]

[5]

[5]

[5]

[5]

- ii) Obtain general solution of the differential equation  $y'' 3y' 4y = 6 e^x$ .
- **Q3**) a) Attempt any one of the following :
  - i) Explain the method of undermined coefficients to solve the equation F(D)y = R(x).
  - ii) If  $\phi(-a^2) \neq 0$  then prove that -

$$\frac{1}{\phi(D^2)}\cos(ax+b) = \frac{1}{\phi(-a^2)}\cos(ax+b)$$

- b) Attempt any one of the following:
  - i) Find a particular solution of  $y'' y = \sin x$ .
  - ii) Obtain power series solution of the differential equation  $(1 x^2) y'' 4xy' + 2y = 0$  about origin.
- Q4) a) Attempt any one of the following :
  - i) Explain the method of variation of parameters to solve the second

order differential equation 
$$\frac{d^2y}{dx^2} + P(x)\frac{dy}{dx} + Q(x)y = R(x)$$
.

- ii) If w(t) is the wronskian of the two solutions of the homogeneous system of differential equation then prove that either w(t) has no zeros in (a, b) or  $w \equiv 0$  on (a, b).
- b) Attempt any one of the following :
  - i) Obtain power series solution of equation y'' + xy' + 3y = 0 about point x = 0.

ii) Find general solution of the system 
$$\frac{dx}{dt} = x + y, \frac{dy}{dt} = 4x - 2y$$
.

Time : 2 Hours]

[Max. Marks : 35

[Total No. of Pages : 3

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.

**Q1**) Attempt any five of the following :

- [5×1=5]
- a) Give an example of LPP whose feasible solution contains unique point.
- b) Define slack variable and surplus variable.
- c) Use graphical method to show that the following LPP has an infeasible solution space.

Max  $Z = 3x_1 + 4x_2$ Subject to  $x_1 - x_2 \le -1$  $-x_1 + x_2 \le 0$ and  $x_1, x_2 \ge 0$ 

d) Obtain the optimal object value of the following problem by observing the dual of the problem

Min 
$$Z = 10x_1 + 4x_2$$
  
Subject to  $5x_1 + 4x_2 \ge 50$   
 $x_1, x_2 \ge 0$ 

- e) What is degeneracy in a transportation problem? How is it resolved?
- f) Define unit worth of a resource.
- g) What is the purpose of a dummy row or column in an assignment problem?

*P.T.O.* 

Q2) a)Attmept any one of the following :[5]i)Explain the standard form of linear programming problem.ii)Explain the canonical form of LPP for maximization.b)Attempt any one of the following :i)Solve the following LPP by the graphical methodMin
$$Z = 20x_1 + 10x_2$$
Subject to  $x_1 + 2x_2 \le 40$  $3x_1 + x_2 \ge 30$  $4x_1 + 3x_2 \ge 60$  $x_1, x_2 \ge 0$ ii)Solve the following LPP by simplex methodMax $Z = 2x_1 + 3x_2$ Subject to  $2x_1 + x_2 \le 4$  $x + 2x_2 \le 5$  $x_1, x_2 \ge 0$ ii)Attempt any one of the following :[5]i)Explain the least cost method for binding initial basic feasible solution to transportation problem.

ii) Write down assumptions for assignment problem.

i) Check whether the given solution  $x_{13}=60$ ,  $x_{21}=50$ ,  $x_{22}=20$ ,

[5]

$$x_{32} = 60, x_{33} = 20$$
 to the following T.P. is optimal  $\begin{bmatrix} 8 & 7 & 3 \\ 3 & 8 & 9 \\ 11 & 3 & 5 \end{bmatrix}$ 

ii) Find proper assignment schedule of five machines to five jobs that minimizes the total cost associated to the following problem.

Machines

		Ι	Π	III	IV	V
	А	6	12	3	11	15
	В	4	2	7	1	10
Jobs	С	8	11	10	7	11
	D	16	19	12	23	21
	Е	9	5	7	6	10

- *Q4*) a) Attempt any one of the following :
  - i) Write mathematical model for transportation problem with m-sources and n-destinations.
  - ii) Explain maximization case in assignment problem.
  - b) Attempt any one of the following :
    - i) Consider the followig LPP

Min  $Z = 2x_1 + 3x_2$ 

Subject to  $x_1 + x_2 \ge 5$ 

$$x_1 + 2x_2 \ge 6$$

$$x_1, x_2 \ge 0$$

The optimal simplex tableau at the end of phase - I B given as

Basic	<i>x</i> <sub>1</sub>	<i>x</i> <sub>2</sub>	<i>x</i> <sub>3</sub>	<i>x</i> <sub>4</sub>	R <sub>1</sub>	$R_2$	Solution
r	0	0	0	0	-1	-1	0
<i>x</i> <sub>1</sub>	1	0	-2	1	2	-1	4
<i>x</i> <sub>2</sub>	0	1	0	-1	-1	1	1

Use phase - II determine the optimum solution of the LPP.

ii) Solve the following assignment problem for maximization profit.

	Sales Territories					
		Ι	II	III	IV	V
	А	16	15	17	10	8
	В	16	16	20	15	12
Salesman	С	12	8	10	13	15

- 2) Figures to the right indicate full marks.
- *Q1*) Attempt any five of the following:

[5]

[5]

[5]

- a) Is  $\gamma(t) = (t^2, t^4)$  a parametrisation of parabola  $y = x^2$ ?
- b) Define a sucface in  $\mathbb{R}^3$ .
- c) Find parametrisation of the level curve  $u^2 x^2 = 1$ .
- d) Is the curve  $\overline{\gamma}(t) = (\cos^2 t, \sin^2 t), -\infty < t < \infty$  regular? Justfy.
- e) State frenet serret equations
- f) State isoperimetric inequality.
- g) Find first fundamental form of surface.

 $\sigma(u,v) = (u, v, u^2 + v^2).$ 

- **Q2**) a) Attempt any one of the following.
  - i) Prove that any tangent developable is isometric to a plane.
  - ii) Prove that transition maps of smooth surface are smooth.

#### b) Attempt any one of the following:

- i) Find the torsion of the circular helix.  $r(\theta) = (a\cos\theta, a\sin\theta, b\theta).$
- ii) Find arc length along cycloid

 $r(t) = a(t - \sin t, 1 - \cos t) \ 0 < t \le 2\pi.$ 

- **Q3**) A) Attempt any one of the following:
  - a) Prove that parametrised curve  $r: (a, b) \to \mathbb{R}^n$  is unit speed curve if it is regular.

*P.T.O.* 

- b) State and prove Wirtinger's inequality.
- b) Attempt any one of the following:
  - i) Show that the circular cylinder

 $S = \{(x, y, z) \in \mathbb{R}^3 | x^2 + y^2 = 1\}$  can be covered by a single surface patch, and so is a surface.

[5]

[5]

- ii) Find the equcation of tangent plane of the surface  $\sigma(u, v) = (u, v, u^2 v^2)$  at point (1, 1, 0).
- Q4) a) Attempt any one of the following: [5]
  - i) Prove that area of a surface patch is unchanged by reparametrisation.
  - ii) Show that every isometry is a conformal map.
  - b) Attempt any one of the following:
    - i) Datermine the area of part of the parabaloid  $z = x^2 + y^2$ ,  $z \le 1$ .
    - ii) Show that every point on the surface of revolution.

 $\sigma(u, v) = f(u)\cos v, f(u)\sin v, g(u)$ 

is parabalic if and only if  $\sigma$  is part of a circular cylinder or a circular cone.

**Q1**) Attempt any Five of the following

a) Suppose a, b and c are integers variable that have been assigned a = 8, b = 3 and c = -5.
Determine the value of the following airthmetic expression:

(a\*c) % b

- b) Define variables in C.
- c) What is purpose of while loop?
- d) Write the syntax of if ..... else loop.
- e) A C-program contains the following variable declarations: int i = 12345, j = 0 xabcdg, k = 077777; Show the output from the following print f statement.

printf ("%3d, %3*x*, %30", i,j,k);

f) In the given below code, What will be the value of a variable x?# include <stdio.h>

```
main ()
{
    inty = 100;
    constint x = y;
    printf ("%d\n", x);
    return 0;
    }
```

g) Indicate what values are assigned to the individual array elements for float C [8] = {2., 5., 3., -4., 12., 0., 8.}

*P.T.O.* 

- *Q2*) a) Attempt any one of the following:
  - i) What is an operator? Describe several different types of operators that are included with in the C language.
  - ii) Explain the need and advantages of function.
  - b) Attempt any one of the following: [5]
    - i) Write a C Program to calculate the factorial of an integer using the function.
    - ii) Write a C Program to find the real root of the quadratic equation.

<b>Q</b> 3)	a)	Atte	mpt any one of the following:	[5]		
		i)	Write in brief about switch statement. Also write its syntax.			
		ii)	Write in brief about do-while statement. Also write its syntax.			
	b)	Atte	Attempt any one of the following:			
		i)	Write a C - Program to check whether the given number is prime not.	e or		
		ii)	Write a C - Program to calculate the average of n - numbers.			
Q4)	a)	Atte	mpt any one of the following:	[5]		
		i)	What is recursion? Explain how it works?			
		ii)	What is an array variable? How does an array variable differ fr an ordinary variable?	om		
	b)	Atte	mpt any one of the following:	[5]		
		i)	Write a C - Program to find area of triangle.			
		ii)	Write a C - Program to print value of <i>x</i> for $f(x)$ . where $f(x) = x^2$ , if $x < x^2$	< 0		
			= 25, if x	=0		
			$= e^x$ , if $x \ge 1$	> 0.

- **Q3**) a) Attempt any <u>one</u> of the following:
  - i) For any positive real number x, show that  $[x] + [x + \frac{1}{2}] = [2x]$ .
  - ii) State and prove Wilson's theorem.
  - b) Attempt any <u>one</u> of the following:
    - i) Find all integers that gives remainder 1, 2, 3 when divided by 3, 4 and 5 respectively.
    - ii) Find the highest power of 14 dividing 100!.
- *Q4*) a) Attempt any <u>one</u> of the following:
  - i) For any positive integer *n* show that  $\sigma(n) = \prod_{p^{\alpha//n}} \left( \frac{p^{\alpha+1}-1}{p-1} \right)$ .
  - ii) State and prove unique factorization theorem.
  - b) Attempt any <u>one</u> of the following:
    - i) Show that  $61!+1 \equiv 0 \pmod{71}$ .
    - ii) Prove that there are infinitely many pairs x, y such that x + y = 100and (x, y) = 5.

### MT - 356(C) : Laplace Transform and Fourier Series (CBCS - 2019 Pattern) (Semester - V) (DSE - 3B) (35116C)

5

Time : 2 Hours]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.

*Q1*) Attempt any five of the following:

- a) Evaluate  $\int_{-\pi}^{\pi} \cos 2x \sin 3x \, dx$ .
- b) Find  $L[2\sin^2 t]$
- c) Evaluate  $\int_{0}^{x^2} e^{-x} dx$
- d) Find  $L^{-1}\left\{\frac{1}{s^2-4s+8}\right\}$
- e) Find F(t) \* G(t), where  $F(t) = 2 \& G(t) = e^{t}$ .
- f) Solve: y'' + y = 0; y(0) = 1 and y'(0) = 0.
- g) Solve:  $y' y = e^t$ ; y(0) = 0.

[Max. Marks : 35

- *Q2*) a) Attempt any one of the following:
  - i) If L[F(t)] = f(s), then prove that L[F'(t)] = sf(s) F(0).

ii) If 
$$L[F(t)] = f(s)$$
, then prove that  $L\left\lfloor \frac{F(t)}{t} \right\rfloor = \int_{s}^{\infty} f(s) ds$ .

i) Find 
$$L[t^2 \sin ht]$$
.

ii) Evaluate 
$$\int_{0}^{\infty} \frac{e^{-4t} - e^{-2t}}{t} dt$$

$$Q3$$
) a) Attempt any one of the following:

i) If L[F(t)] = F(s) and is any positive constant, then prove that  $L[F(at)] = \frac{1}{a} F(\frac{s}{a}).$ 

ii) If 
$$L^{-1}{F(s)} = F(t)$$
, then prove that  $L^{-1}{F(s-a)} = e^{at} F(t)$ .

i) Find  $L^{-1}\left\{\frac{3s+1}{s^2+6s+13}\right\}$ .

ii) Find 
$$L^{-1}\left\{\frac{1}{2}\log\left(\frac{s^2-a^2}{s^2}\right)\right\}$$

- i) Prove that the inverse Laplace transform is linear operator.
- ii) State and prove the convolution theorem.

i) Solve: 
$$y'' + 3y' + 2y = t$$
;  $y(0) = 1$  and  $y'(0) = -1$ .

ii) Solve:  $y'' + y = 6\cos 2t$ ; y(0) = 3 and y'(0) = 1.

*Time : 2 Hours ]* 

Instructions to the candidates:

- *1*) Q.1 is compulsory
- Solve any 3 questions from Q.2 to Q.5. 2)
- 3) Q.2 to Q5 carry equal marks.
- Figure to the right indicate full marks. *4*)
- Use of calculator and log table is allowed. 5)

Q1) Solve any Five of the following.

- Define orthogonal co-ordinate system. a)
- Give the idea of Minkowski's space. b)
- c) A spaceship moving away from earth with a speed 0.9c fires a missile in the same direction as its motion with a speed 0.9c relative to space ship. what is the missile's speed relative to earth?
- What do you mean by singular point? d)
- Prove that  $J'_0(x) = -J_1(x)$ e)
- f) Define the term co-ordinate surfaces.
- **Q2**) Answer the following.
  - Obtain the equation for the divergence of vector in orthogonal curvilinear a) system. [6]
  - At what speed the mass of proton become double its rest mass? [4] b)
- **Q3**) Answer the following.
  - Obtain the series solution about x=0 of the differential equation a) 4xy''+2y'+y = 0[6]
  - Prove that  $J_2(x) J_0(x) = 2J''_0(x)$ [4] b)

### [5822] - 512 T.Y.B.Sc. **PHYSICS**

### PHY - 352 : Electrodynamics (2019 Pattern) (Semester - V) (2 Credits) (35122)

#### *Time : 2 Hours ]*

Instructions to the candidates:

- *Q.1 is compulsory.* 1)
- 2) Attempt any three questions from Q.2 to Q.5.
- 3) Q. 2 to Q. 5 carry equal marks.
- 4) Figures to the right indicate full marks.
- Use of calculator & log table is allowed. 5)

*Q1*) Solve any Five of the following.

- What is polar molecule? a)
- Give two limitations of Coulomb's law. b)
- Define magnetic permeability. c)
- What is magnetic flux? Give its S.I. unit. d)
- State Faraday's law of electromagnetic induction. e)
- f) Give physical significance of Maxwell's equations.

**Q2**) Answer the following questions.

Discuss in brief types of polarization. a)

#### OR

Describe the magnetic vectar potential (A).

- Two point charges in a dielectric medium having K=5.2 interact with a b) force of  $8.6 \times 10^{-3}$ N. What could be the force if the charges were in free space? [4]
- Q3) Answer the following questions.
  - State and explain Biot-Savart law. a)

#### OR

Discuss magnetic induction due to straight current carrying conductor.

b) The average energy per second reaching the earth from the sun is about  $1350g/Sec-m^2$ . Assume this is a single EM wave and calculate the maximum values of E & B fields for sunlight at the earth. [4]

*P.T.O.*

#### Time : 2 Hours]

Instructions to the candidates:

- 1) Question1 is compulsory.
- 2) Solve any three questions from Q 2 to 5.
- 3) Que.2 to Que.5 carry equal marks.
- 4) Figures to the right indicates full marks.
- 5) Use of calculator and Log.table is allowed.
- Q1) Solve any Five of the following
  - a) Write down the equation of motion of charged particle having charge 'q', mass 'm', moving with velocity  $\vec{V}$  in magnetic fileld induction  $\vec{B}$ .
  - b) Give the trajectory of charged particle moving in constant magnetic field.
  - c) What is meant by central force.
  - d) Find the reduced mass of system of two particles having equal masses.
  - e) What is meant by elastic collision?
  - f) What are holonomic constraints?

*Q2)* Answer the following.

a) Show that the path of charged particle moving in uniform transverse electric field is parabola. [6]

OR

Find the relation between the scattering angles in LAB and C.M. system in two body elastic collision. [6]

- b) Distinguish between elastic and in elastic scattering. [4]
- *Q3*) Answer the following.

*P.T.O*.

a) Explain how a two body problem can be reduced into equivalent one body problem. [6]

OR

Define centre of mass. Of system. Obtain velocity and acceleration for the system of particles. [6]

- b) The distance between sun and earth is suddenly reduced to half of it's present distance. What will be duration of year. [4]
- *Q4)* Answer the following.
  - a) What is meant by inelastic scattering. Obtain Q-value equation in inelastic scattering process. [6]

OR

Derive the differential equation of orbit in central force motion. [6]

- b) Obtain Hamiltonion and Hamiltonion equation of motion for simple pendulum from it's Lagrangian. [4]
- Q5) Attempt <u>any four</u> of the following.
  - a) State and prove Kepler's second law od planetory motion.
  - b) Show that the kinetic energy od charged particle remains constant during it's motion in constant magnetic Field.
  - c) what is meant by exoergic and endoergic process.
  - d) what is meant by non holonomic constraints. Give it's two explampes.
  - e) Explain cyclic co-ordinates.

Instructions to the candidates:

- 1) Q. 1 is compulsory.
- 2) Solve any three questions from Q.2 to Q.5.
- 3) Question 2 to Q.5 carry equal marks.
- 4) Figures to right indicates full marks.
- 5) Use of calculator and logtable is allowed.

*Q1*) Solve any five of the following:

- a) Write formula for Balmer series of hydrogen atom.
- b) Define interaction energy.
- c) What are stoke's and antistoke's lines in Raman spectra?
- d) How many subshells are possible in M shell of an atom?
- e) What is linear stark effect?
- f) In which region of EM Spectrum, the pure rotational spectra lies?
- **Q2**) Attempt the following questions :
  - a) State and prove Lande's interval rule. Represent it graphically for 3D term. [6]
  - b) Compare Normal and anomalous zeeman effect. [4]

*P.T.O.* 

[Total No. of Pages : 2

**SEAT No. :** 

[5]

[Max. Marks: 35

- *Q3*) Attempt the following questions:
  - a) Explain Paulli's exclusion principle and Hund's rule with suitable examples. [6]
  - b) The ionization energy of sodium is 494.7 kJmol<sup>-1</sup>. Calculate the wavelength for electro magnetic radiation which is just sufficient to ionize sodium? (NA =  $6.02 \times 10^{23}$ , C =  $3 \times 10^8$  m/s, h =  $6.63 \times 10^{-3}$  Js) [4]
- *Q4*) Attempt the following questions:
  - a) With neat diagram explain experimental arrangement to study Normal zeeman effect. [6]
  - b) A sample was excited by 4358A°. A Raman line was observed at 4447A°. Calculate Raman shift in wave number. [4]

[10]

- *Q5*) Attempt any four of the following :
  - a) Write electronic configuration of Ge. [Z = 32].
  - b) What is mean by parahelium and orthohelium.
  - c) Write features of stark effect.
  - d) What is a sodium doublet?
  - e) What is electronic spectra of molecule?
  - f) An electron collides with hydrogen atom in its ground state and excites it into state of n = 2. How much energy is gained by hydrogen atom in its inelastic collision?

### (2019 Pattern) (Semester - V) (Discipline Specific Elective Course) (35125)

Time : 2 Hours]

Instructions to the candidates:

- 1) Q.1 is compulsory.
- 2) Solve any three Questions from Q2 to Q.5.
- 3) Question 2 to 5 carry equal marks.
- 4) Figures to right indicate full marks.
- 5) Use of calculator and log table is allowed.

*Q1*) Solve any <u>Five</u> of the following:

- a) Define Keywords.
- b) State the basic data types used in 'C'.
- c) What are the two ways of passing arguments to the function.
- d) What is pixel.
- e) State the formula for Trapezoidal rule of integration.
- f) In the bisection method, if  $f(x) = x^3 x 1 = 0$  has real root lies in the interval [1, 2] what is the approximate value of the root i.e. initial guess of the root  $(x_0)$ ?
- Q2) Answer the following questions:
  - a) What is meant by operators and expressions. Explain any three types of operator used in 'C'. [6]
  - b) Find the real root of the equation  $x^3 2x 5 = 0$  using Newton Raphson method. [4]
- *Q3*) Answer the following questions:
  - a) What do you mean by flowchart? Explain meaning of various symbols used in a flowchart. [6]
  - b) Write a 'C' program to draw line, circle, ellipse and rectangle. [4]

*P.T.O.* 

[5]

[Max. Marks : 35

- *Q4*) Answer the following questions:
  - a) What is recursion? Write a 'C' program to find factorial of a given number using recursion method. [6]

b) Evaluate 
$$\int_{0}^{1} x^{2} dx$$
 using Trapezoidal rule, Take step size  $h = 0.1$  [4]

Q5) Write short notes on any <u>Four</u> of the following. [10]

```
a) State the o/p of following 'C' - program
# include <stdio.h>
main ()
{
    int i = 5;
    while (i > = 0) {
        i --;
        if (i = = 3) break;
        printf ("%d", i);
    }
```

- }b) Distinguish between scanf () and print f () function.
- c) Write a graphics program to draw the line and rectangle.
- d) Find the real root of the equation  $f(x) = x^3 2x 5 = 0$  lies in which interval.
- e) Explain return statement in user defined function.

```
f) # include <stdio.h>
main ()
{
    int v =3, * pv, u1, u2;
        u1=2* (v + 5);
        pv= & v;
        u2 = 2 * (*pv + 5);
        printf ("\n u1 = % 2d\n u2 = % 2d", u1 u2);
    }
What is the output of the program.
```

*Time : 2 Hours]* 

Instructions to the candidates:

- 1) Question No. 1 is compulsory.
- 2) Solve any three from Q.2 to 5.
- 3) Q.2 to 5 carries equal marks.

*Q1*) Solve any five:

a) What is boxing in C#?

b) What is unboxing in C#?

- c) What are the properties in C#?
- d) What are the classes in C#?
- e) What is Jugged Arrays?
- f) What is the difference between system-array-copy to ( ) and systemarray-clone To ( )?

1051

**Q2**) Describe following:

a)	.NET Basic Architecture.	[6]
b)	CLR in C#.	[4]

[5]

*P.T.O.* 

*Q3*) Explain the following program code:

	a)	Using system;	[6]
	,	namespace Hellow World	
		{	
		Class Program	
		Static void Main (String [ ] args)	
		{ Console writeline ("Hellow World!")	
		<pre>Console.writerine ( Trenow world: ) }</pre>	
		}	
		}	
	b)	Explain C# & .NET framework.	[4]
0.0	D'		
Q4)	Disc	suss the following terms:	
	a)	ADO.NET	[6]
	b)	Methods in C#	[4]
Q5)	Writ	e a short note on any four:	[10]
	a)	Methods.	
	b)	Class & Objects.	
	c)	Constants.	
	d)	Variables.	
	e)	Data Fetching from SQL Server database.	
	f)	Array.

#### PHY-356 (G) Acoustics-I (2019 Pattern) (Semester-V) (Elective-I) (35126G)

#### Time : 2 Hours]

Instructions to the candidates:

- 1) Q.1 is compulsory.
- 2) Solve any 3 questions from Q.2 to Q.5.
- 3) Q.2 to Q.5 carry equal marks.
- 4) Use of calculator and log table is allowed.
- 5) Figures to the right Indicate full marks.

*Q1*) Answer any five of the following.

- a) What is optimum reverberation?
- b) What does IL stands for?
- c) What is tremelo?
- d) Define timbre in musical sound.
- e) What is difference between headphone and earphone?
- f) Define sound absorption?

Q2) Answer the following question.

- a) What is working of innear ear? Explain it with the help of neat diagram.[6]
- b) If reverberation time is of 3.22 sec for a room of volume 1600m<sup>3</sup> then what will be total sound absorption? [4]
- Q3) Answer the following questions.
  - a) What is a Helmholtz's resonater? Deduce an expression for the natural frequency of vibration of a Helmholtz resonater. Write an expression for quality factor of it. [6]
  - b) If intensity level  $[I_L]$  is the total noise level obtained by combining n identical pure tones. Each intensity level  $I_L$  dB, then show that  $(I_L)_t = 10 \log_{10} n + I_L dB$ . [4]

[Max. Marks : 35

[5]

*P.T.O.* 

SEAT No. :

[Total No. of Pages : 2

- Q4) Answer the following questions.
  - a) Compare the following sound fields like near field, far field and free field. [6]
  - b) Determine the room modes 800, 302, 122 and 222 for a seminar hall of size  $54 \times 36 \times 15$  ft. What do you conclude? use C = 1130 ft/sec. [4]

**Q5**) Write a short notes on any four questions.

- a) Pros and cons of headphones.
- b) Sound absorption material.
- c) Anechoic chamber.
- d) Expansion chamber mufflers.
- e) FET analysis.
- f) Audiometry.

## PHY-3510(H): Python Programming (SEC-I) (2019 Pattern)(Semester-V)(35210H)

*Time : 2 Hours]* 

Instructions to the candidates:

- 1) Question 1 is compulsory.
- 2) Solve any three questions from Que.2 to Que.5.
- 3) Que.2 to Que.5 carries equal marks.
- 4) Use of calculator and logtable is allowed.

*Q1)* Solve any five of the followings.

- a) Draw python prompt Symbol.
- b) Express  $5.5 \times 10^{-3}$  in python language.
- c) Define 'Indentation'.
- d) What is use of Iterative statement.
- e) Define recursive function.
- f) State extension of file name in python.

Q2) Answer the following questions

a) What are different types of operators in python? Explain exponential operator with example. [6]

OR

What is iterative statement? Explain syntax of while loop using flow chart.

b) Explain following program and write output. [4]

str = 'Hello'
print (str+'4')

print (str\*5)

*Q3)* Answer the following questions.

a) Explain if-else statement, write syntax and draw flowchart. [6]

*P.T.O.* 

[5]

- b) Write python programme to calculate area of circle. [4]
- **Q4**) Answer the following questions.
  - a) Define function and give its advantages. What is recursive function and Lambda function? [6]

OR

What are packages in python? Compare global and local Variables.

- b) Explain the use of return Statement.
- **Q5)** Write short note on any four of the following

[10]

[4]

- a) Define higher level language and State use of interpreter.
- b) State types of logical operators.
- c) Draw flow-chart of simple if statement.
- d) Define Keyword & write its example.
- e) State any two weaknesses of python programming language.
- f) What is flow chart?

## PHY-3510 (I): Energy Studies (Skill Enhancement Course) (2019 Pattern) (Semester - V) (351210I)

Time : 2 Hours]

Instructions to the candidates:

- Question 1 is compulsory. 1)
- 2) Solve any three questions from Q.2 to Q.5.
- Question No.2 to Question No.5 carry equal marks. 3)
- Figures to right indicate full marks. *4*)
- Calculator and Log-table is allowed. 5)

Q1) Solve any five of the following.

- a) What are the conventional energy sources?
- Define solar constant. b)
- What are the limitations of fixed dome type biogas plant? c)
- Write advantages of electrical vehicles (EV). d)
- Write disadvantages of wind energy. e)
- Define efficiency of photovoltaic cell. f)
- **Q2**) Solve the following questions.

a)	Explain three energy sources to understand their	environmental,
	production and distribution aspects.	[6]

- Describe horizontal axis wind machine with suitable diagram. [4] b)
- Q3) Solve the following questions.
  - Attempt the following. [6] a)
    - Write limitations to photovoltaic efficiency. i)
    - What is biogas? Explain different types of biogas plant. ii)
  - Distinguish between liquid flat plat collector and concentrating collector. b) [4]

*P.T.O.* 

[Max. Marks: 35

[5]

[Total No. of Pages : 2

## PHYSICS (Skill Enhancement Course - II) PHY - 3511(L) Physics Workshop Skill (2019 Pattern) (Semester - V) (351211L)

*Time : 2 Hours] Instructions to the candidates:* 

- 1) Question 1 is compulsory.
- 2) Solve any three questions from Q2 to Q5.
- 3) Questions 2 to 5 carries equal marks.
- 4) Figures to the right indicate full marks.
- 5) Use of calculator and log table is allowed.

*Q1*) Solve any five of the following.

- a) Define Q factor of coil.
- b) Define loading effect.
- c) What is signal generator? State its different types.
- d) What is balancing condition of D.C. bridge?
- e) State advantages of digital meter or analog meter.
- f) Define Resolution.

Q2) Answer the following questions.

a) Draw labeled diagram of cathode ray tube. Explain its construction and working. [6]

Ś

- b) Explain working of A.C. Millivoltmeter with block diagram. [4]
- Q3) Answer the following questions.
  - a) Draw a block diagram of LCR meter and explain its working. State the application of LCR meter. [6]
  - b) Write a principle and construction of voltmeter.

[Max. Marks : 35

[Total No. of Pages : 2

[5]

*P.T.O.* 

[4]

- *Q4*) Answer the following questions.
  - a) Draw a block diagram of digital multimeter and explain its working. [6]
  - b) The expected value of the voltage across a resistor is 80V, However the measurement gives a value of 79V. [4]

Calculate -

- i) Absolute error
- ii) % error
- iii) Relative accuracy
- iv) % of accuracy

*Q5*) Attempt any four of the following.

- a) Explain Q meter.
- b) Explain the cause of gross error.
- c) Dual trace oscilloscope.
- d) Advantage of electronic voltmeter.
- e) Function generator.
- f) Explain function of focus and intensity control on front pannel of CRO.

  - What is symmetry symbol for Porbital? a)
  - What do you mean by stability constant? b)
  - Calculate the magnetic moment for  $Cr^{3+}$  ion by using spin only formula c) (Cr at. no.24)
  - Write IUPAC name of element having atomic number 111. d)
  - Define semiconductor. e)
  - Arrange the following metals according to their decreasing order of f) electrical conductivity Na, Al, Mg.

#### *Q2*) a) Answer any two of the following. **[6]**

- i) Explain chelate effect.
- Discuss about variable oxidation state shown by transition elements. ii)
- Write assumptions of  $r \cap \circ \tau$ . iii)
- Answer the following. **b**)
  - i) Distinguish between inert and labile complexes.
  - Explain Non-Stoichiometry with suitable example. ii)

*P.T.O.* 

[5]

[Max. Marks: 35

[Total No. of Pages : 2

[4]

- **Q3**) a) Answer any two of the following.
  - i) Explain the use of heavy ion for bombardment in the preparation of trans uranic elements.
  - ii) What is n-type semiconductivity? Explain with the help of N(E)E curve.
  - iii) What do you mean by associative mechanism? Explain it with the help of reaction profile.
  - b) Discuss the process for sepration of Lanthanides. [4]
- *Q4*) a) Answer any two of the following.
  - i) Why  $CuSO_4$  is blue while  $ZnSO_4$  white?
  - ii) What is lanthanide contraction? Discuss the effect of Lanthanide contraction.

 $\bullet$ 

- iii) Define super conductivity. Draw the structure of  $\gamma Ba_2 Cu_3 O_7 \delta$
- b) Draw and explain the molecular orbital energy level diagram for  $[Ni(NH_3)_6]^{2+}$  without  $\pi$ -bonding. [4]
- *Q5*) Write a note on any four.
  - a) Spectrochemical series.
  - b) Charge transfer spectra.
  - c) Oxidation state of d-block elements.
  - d) Misch metal.
  - e) Effect of temperature on conductivity of metal
  - f) N(E) Curve

## **CH - 505 : Industrial Chemistry** (CBCS 2019 Pattern) (Semester - V) (35135)

*Time : 2 Hours ]* 

Instructions to the candidates:

- 1) *Q.* 1 is compulsory.
- Solve any three questions from Q.2 to Q.5. 2)
- Questions 2 to 5 carry equal marks. 3)

*Q1*) Solve any five of the following:

- What is unit operation? a)
- Define the term selectivity. b)
- Write any two uses of nitric acid. c)
- Explain the term molasses. d)
- What are surfactants? e)
- f) Define the term auxochrome.
- *Q2*) a) Attempt any two of the following :
  - Explain the physicochemical principle involved in manufacture of i) sulphuric acid.

35.1

- Discuss conditions favourable for fermentation. ii)
- iii) What are the properties and uses of white lead.
- b) Write short note on : [4]
  - i) Copyright
  - ii) **Detergent builders**

[5]

*P.T.O.* 

**SEAT No. :** 

[Total No. of Pages : 2

[Max. Marks : 35]

**[6]** 

Q3)	a)	Explain any two of the following :				
		i)	Give the importance of fermentation industry.			
		ii)	Distinguish between soap and detergent.			
		iii)	Write the synthesis and uses of phenolphthalein.			
	b)	Ans	wer the following :	[4]		
		i)	Discuss the functions of HR.			
		ii)	Write a note on cleaning action of detergent.			
Q4)	a)	Ans	wer any two of the following :	[6]		
		i)	$SO_3$ cannot be absorbed in water. Explain.			
		ii)	Write the synthesis and use of aniline yellow.			
		iii)	Give the synthesis and uses of fluorescein.			
	b)	Attempt the following :				
		i)	Explain the term quality control.			
		ii)	Define the terms conversion and yield.			
Q5)	Atte	mpt a	any four of the following : [	10]		
	a)	Writ	e a short note on sulphuric acid fog.			
	b)	Exp amm	lain the physicochemical principles involved in manufacture nonia.	e of		
	c)	Disc	cuss the uses of molasses.			
	d)	What are basic requirements for fermentation.				
	e) Explain the cationic and anionic surfactants.					
	f)	Disc	cuss the raw material required for manufacture of soap.

## CH : 507 - Organic Chemistry - I (CBCS 2019 Pattern) (Semester - V) (Regular) (35137)

*Time : 2 Hours]* 

Instructions to the candidates:

- 1) Q.1 is compulsory.
- 2) Solve any three questions from Q2 to Q.5.
- 3) Question 2 to 5 carry equal marks.
- 4) Figures to right indicate full marks.

*Q1*) Solve <u>any five</u> of the following:

- a) Write synthesis of furan from, 4-diketone.
- b) How is diethylmalonate prepared?
- c) Why furan is aromatic in nature?
- d) Name any two rearrangement reaction which takes place under thermal conditions.
- e) State Hoffman elimination.
- f) What is E1cB elimination?

#### Q2) a) Attempt <u>any two</u> of the followings:

- i) Describe electrophilic substitution reactions of Naphthalene.
- ii) Explain the synthesis of Butyric acid from ethyl acetoacetate.
- iii) Kinetic Isotopic effect is not observed in  $E_1$  mechanism. Justify?

#### b) Answer the following:

- i) 2-Bromopentane on heating with NaOME gives 70% 2-pentene. Explain.
- ii) Explain McLafferty rearrangement.

#### **Q3**) a) Attempt <u>any two</u> of the following:

- i) Pyridine undergoes electrophilic substitution mainly at position 3. Explain.
- ii) Explain the reaction & mechanism of Favorski reacrrangement with suitable example.
- iii) Explain orientation & reactivity in  $E_2$  elimination reaction.

*P.T.O.* 

[Total No. of Pages : 2

[Max. Marks : 35

**SEAT No. :** 

[5]

[6]

**[6]** 

[4]

b) Predict the product/s and justify answer.

i) 
$$2HC \equiv CH \xrightarrow{HCN}_{\Delta} A \xrightarrow{3H_2}_{Na/C_2H_5OH} B$$
  
ii) 
$$H_3C \xrightarrow{\parallel}_{C-C-CH_2} \xrightarrow{\parallel}_{C-O\mathcal{E}t} \xrightarrow{\oplus NaO\mathcal{E}t}_{\oplus CH_3CH_2-Br} A \xrightarrow{H_2O/H^+}_{\Delta,-CO_2} B$$

*Q4*) a) Discuss any <u>two</u> of the following:

- i) Explain Claisen rearrangement reaction takes place at ortho and para position.
- ii) What is the reaction of following reagents with Pyrrole?
  - 1) Cold  $H_2SO_4$ .
  - 2)  $CH_3COC1/A1C1_3$ , Benzene.
  - 3) Phenyl Diazorium slat.
- iii) Explain the formation and stability of carbocation.

i) 
$$\xrightarrow{\text{m-CPBA}} A + B$$

ii)

$$\begin{array}{c} H_{3}C-CH_{2}-CH-CH_{3} \xrightarrow{Moist Ag_{2}O} A \xrightarrow{H_{2}/Ni} B\\ \downarrow\\ N_{\oplus}(CH_{3})_{3}I^{\ominus} \end{array}$$

Q5) Write short notes on (any four).

[10]

- a) Schmidt Rearrangement.
- b) Haworth synthesis of Anthracene.
- c) Beckmann Rearrangement.
- d) Evidences of  $E_1$  mechanism.
- e) Pinacol-Pinacolone rearrangement.
- f) Nucleophilic substitution Reactions of Pyridine.

*Time : 2 Hours]* [*Max. Marks* : 35 Instructions to the candidates: *1*) Q.1 is compulsory. Solve any three questions from 0.2 to 0.5. 2) Questions 2 to 5 carry equal marks. 3) 4) Figure to right indicate full marks. 5) Draw neat diagrams whenever necessary. Use of logarithm lables and calculations is allowed. **6**) **Q1**) Solve any five of the following. [5] i) Give any three functions of Endoplasmic Reticulum. ii) Draw structure of maltose. Define peptide bond. iii) What are the types of Blood Group? iv) Give two examples of oxidoreductase Enzyme. v) What are Group I hormones? vi) Attempt any two of the following: *Q2*) a) **[6]** i) What are carbohydrates? What is the action of following on Glucose? 1) Br<sub>2</sub>/water 2)  $H_2 / Ni$ What are amino acids? Fxplain the reaction of amino acid with ii) 1) Sanger's reagent 2) Dansyl chloride What are Hormones? Describe the classification of Hormones. iii) Solve the following: [4] b) What is saponification number? Write its significance. i)

> What are the uses of enzymes in chemical industry? ii)

## **SEAT No. :**

[Total No. of Pages : 2

Q3)	a)	Ans	wer any two of the following.	[6]
		i)	What are Eukaryotes? Explain in detail.	
		ii)	What is rancidity? Write different types of rancidity.	
		iii)	What are enzymes? Describe the classification of enzymes.	
	b)	Solv	ve the following.	[4]
		i)	Write notes on classification of carbohydrates.	
		ii)	Explain the following terms	
			1) Ampholytes	
			2) Zwitter ion	
<b>Q4</b> )	a)	Ans	wer any two of the following.	[6]
		i)	What are monosaccharides? Explain the reaction of following w D-Glucose	vith
			1) $\text{Dil}\text{HNO}_3$	
			2) NaBH <sub>4</sub>	
		ii)	What is a polypeptide? Give features of peptide bond.	
		iii)	Write short notes on Hormones of Gonad.	
	b)	Solv	ve the following.	[4]
		i)	What is iodine number? What are its significance?	
		ii)	Explain the different types of Specificity of enzymes.	
Q5)	Writ	e sho	ort notes on any four of the following.	10]
	i)	Give	e the function of cell wall & cell membrane in detail.	
	ii)	Wha	at are polysaccharides? Give a brief account of Amylose & Cellul	ose.
	iii)	Wha	at are waxes? Give importance of waxes.	
	iv)	Wha	at are proteins? Discuss $lpha$ -helical structure with neat labelled diagr	am.

- v) Define active site of enzyme. Discuss the effect of substrate concentration on rate of enzyme catalysed reaction.
- vi) What is endocrine gland? Explain the functions of Hormones.

## CH - 510(A) : Introduction of Medicinal Chemistry (2019 CBCS Pattern) (Semester - V) (351310A)

*Time : 2 Hours]* 

Instructions to the candidates:

- 1) Question 1 is compulsory.
- 2) Solve any 3 questions from Q.2 to Q.5.
- 3) Q.2 to Q.5 Carry equal Marks.
- 4) Figures to the right indicates full marks.
- 5) Draw neat diagrams whereer necessary.
- 6) Use of logarithm tables & Calculators is allowed.

*Q1*) Solve any five of the following.

- a) What is a drug?
- b) What is 'ADME' of a drug?
- c) Name any two non infections diseases.
- d) What are polyene antibiotics?
- e) What is selective toxicity?
- f) Draw the general structure of sulphonamides.
- *Q2*) a) Solve any two of the following.
  - i) Draw the structure of penicillin G and discuss its mode of action.
  - ii) What are antiinflammatory agent? Explain its two types with an example each.
  - iii) Give a brief over view of antiviral agents.
  - b) Answer the following.
    - i) What is 'SAR'? Explain with an example.
    - ii) Discuss classification of drugs on the basis of sources.

SEAT No. :
- **Q3**) a) Answer any two of the following.
  - i) What is cis platin? Give its mode of action. And also give any 2 side effects of it.
  - ii) What are macrolides? Give one example. Discuss mode of action of macrolides.
  - iii) Explain following terms with an example of each.
    - a) Serendipity
    - b) Sedatives
    - c) Antacids
  - b) Discuss importance of various physical properties of drugs in designing. What type of reactions drug can undergo in body? [4]
- *Q4*) a) Answer any two of the following.
  - i) Discuss fungal infections and antifungal agents.
  - ii) What are tetracyclins? Discuss their SAR and mode of action.
  - iii) Discuss Covid-19 vaccines.

b) Answer the following.

- i) What is Therapeutic Index.
- ii) Explain Lipinski Rule of five.

Q5) Draw structure write any 2 properties and mode of action of any 4 drugs.[10]

- a) Ibuprofen
- b) Aspirin
- c) Acyclovir
- d) Chloramphenicol
- e) Ampnotrecin-B
- f) Benzodiazepine

## **CH-510B : Polymer Chemistry** (CBCS 2019 Pattern) (Semester - V) (351310B)

Time : 2 Hours]

Instructions to the candidates:

- Question 1 is compulsory. **1**)
- 2) Solve any three questions from Q.2 to Q.5.
- Question No.2 to Question No.5 carry equal marks. 3)
- Figures to the right indicate full marks. *4*)
- Draw neat diagrams wherever necessary. 5)
- Use of logarithm tables and calculator is allowed. **6**)

**Q1**) Attempt the following (any five)

- Define the term-polymerisation. a)
- Terylene is the trade name of b) \_ polymer.
- Name any two initiators used in anionic polymerisation. c)
- In which polymerisation technique the polymerisation proceeds at the d) interface between an aqueous and organic medium?
- Calculate the molecular weight of polyethylene polymer whose degree of e) polymerisation is 1800.
- PMMA is the abbreviation used for \_\_\_\_\_\_ polymer. f)
- *Q2*) a) Attempt the following (any two)
  - i) Give the full account of cationic polymerisation.
  - What are surfactants? Explain the micelle formation in emulsion ii) polymerisation.
  - iii) Write the synthesis, properties and uses of polystyrene.
  - Distinguish between the following. [4] b)
    - i) Homopolymer and Copolymer.
    - Linear and crosslinked polymer. ii)

*P.T.O.* 

[5]

[Max. Marks: 35

**SEAT No. :** 

[6]

- *Q3*) a) Attempt the following (any two)
  - i) What is glass transition temperature (Tg)? Comment on the Tg value of polyvinyl carbazole.
  - ii) Give a brief account of practical significance of molecular weight of polymers.
  - iii) What is bakelite? Give its commercial applications and draw the structure of bakelite.
  - b) What is meant by addition polymerisation? Give full account of free radical polymerisation with suitable example. [4]
- *Q4*) a) Attempt the following (any two)
  - i) Give advantages and disadvantages of suspension polymerisation.
  - ii) Discuss the methods of preparation of the monomer and polymer 'polyvinyl chloride'.
  - iii) Describe the important properties and applications of silicone polymer.
  - b) A certain polymer sample contains fractions A, B and C with their number and molecular weights as shows below.

Fraction A: 110 molecules with molecular weight 11,000.

Fraction B: 130 molecules with molecular weight 12,000.

Fraction C : 160 molecules with molecular weight 15,000.

Calculate the number average molecular weight  $(\overline{M}n)$  for the polymer.[4]

#### Q5) Write short notes on any four of the following

- a) Molecular forces and bonding in polymers.
- b) Ziegler Natta Catalysts.
- c) Interfacial polymerisation.
- d) Viscometric method for molecular weight determination.
- e) Polyisoprene polymers.
- f) Polyesters.

Instructions to the candidates:

- 1) Question 1 is compulsory
- 2) Attempt any three questions from Q.2 to Q. 5.
- 3) Questions 2 to 5 carry equal marks.
- 4) Figures to the right indicate full marks.
- 5) Draw neat labelled diagrams wherever necessary.

**Q1**) Attempt any five of the following.

- a) Define Cell Biology.
- b) Name the cell organelle(s) having their own genetic material.
- c) Differentiate between euchromatin and heterochromatin.
- d) Enlist enzymes required for prokaryotic DNA replication.
- e) State the role of t-RNA in protein synthesis.
- f) Define operon.

<b>Q2</b> ) a)	Explain ultrastructure and functions of a cell wall.	[6]
b)	Give brief account of prokaryotic promoters.	[4]
<b>Q3</b> ) a)	Discuss a brief account of positive regulation of lac operon.	[6]
b)	Describe the structure of nuclear pore complex.	[4]
<b>Q4</b> ) a)	Give a detailed account of initiation of DNA replication in proka	aryotes.
		[6]

b) Explain types of cell surface receptors. [4]

*P.T.O*.

[Max. Marks: 35]

[5]

[Total No. of Pages : 2

SEAT No. :

Q5) Write short notes on any four of the following.

- Griffith's transformation experiment. a)
- Lampbrush chromosomes. b)
- Structure and functions of peroxisomes. c)
- Initiation of translation. d)
- Types of DNA replication. e)
- Plasmodesmata f)

[10]

## [5822]-546 T.Y. B.Sc. **BOTANY BO - 356 : Genetics**

## (CBCS 2019 Pattern) (Semester - V) (Paper - VI) (35146)

Time : 2 Hours Instructions to the candidates:

- 1) Question 1 is compulsory.
- Attempt any three questions from Q2. to Q.5. 2)
- Questions 2 to 5 carry equal marks. 3)
- Figures to right indicates full marks. 4)
- Draw neat labelled diagrams wherever necessary. 5)

**Q1**) Attempt any Five of the following.

- What is heredity? a)
- Give any two branches of genetics. b)
- What is mutation? c)
- Define multiple alleles. d)
- Which type of antigen and antibody found in blood group 'A'? e)
- What is mean by polyploidy? f)

*Q2*) a) What is linkage? Describe three point test cross with suitable example. [6]

- Comment on cob length in Maize. b)
- What is autopolyploidy? Explain the role of the autopolyploidy in crop **Q3)** a) improvement. [6]
  - Describe masking gene action (12:3:1) with suitable example. b) [4]

[5]

*P.T.O.* 

[4]

**SEAT No. :** 

[Total No. of Pages : 2

[Max. Marks : 35]

- What is sex linked inheritance? Explain with suitable example. [6] **Q4)** a)
  - Comment on characteristics of crossing over. b) [4]

**Q5)** Write short note on any <u>FOUR</u> of the following. [10]

- Backcross with suitable example. a)
- Heteromorphic system of self-incompatibility. b)
- Composition of chromosome c)
- Translocation of chromosomes d)
- Type of mutations e)
- Incomplete dominance f)

### [5822]-565 T.Y.B.Sc. STATISTICS ST-351: Distribution Theory-I (2019 Pattern) (Semester - V) (35171)

Time : 2 Hours]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figure to the right indicate full marks.
- 3) Use of statistical tables and calculator is allowed.
- 4) Symbols and abbreviations have their usual meaning.

*Q1*) Attempt each of the following.

- a) In each of the following cases, choose the correct alternative:
  - i) if  $X \rightarrow C$  ( $\mu=0$ ,  $\lambda=1$ )then distribution of  $X^2$  is\_
    - a)  $\beta_1(0.1)$ c)  $\beta_2(1/2,1)$ b)  $\beta_1(1/2, 1/2)$ d)  $\beta_2(1/2, 1/2)$
  - ii) Let  $X \rightarrow \beta_1(3,12)$  and let  $Y = \frac{1-X}{X}$  then the distribution of Y is
    - a)  $\beta_1(3,12)$ b)  $\beta_2(12,3)$ c)  $\beta_2(3,12)$ d)  $\beta_1\left(\frac{1}{3},\frac{1}{12}\right)$
  - iii) A sequence of random variables  $X_1, X_2, ..., X_n$  is said to convergence in probability to  $\alpha$  is for any  $\varepsilon > 0$ , then  $\lim_{n \to \infty} P(|Xn - \alpha| > \varepsilon) =$ \_\_\_\_\_
    - a) 1 b) 0 c)  $\frac{1}{2}$  d)  $\frac{2}{3}$
- b) In each of the following, state whether the given statement is true or false: [1 each]
  - i) If  $X \rightarrow C(\mu, \lambda)$  then the moment generating function of X does not exist.
  - ii) The distribution function of first order statistics  $X_{(1)}$  based on the random sample of size 'n' with distribution F(x) is  $[F(x)]^n$

[Max. Marks: 35

[1 each]

- Q2) Attempt any two of the following.
  - a) A Symmetric die is thrown 600 times. find the lower bound for the probability of getting 80 to 120 sixes.
  - b) If X and Y are independently distributed G(1,1) variates, then state the distribution of  $U = \frac{X}{X + Y}$ . Also find  $P(U \le \frac{1}{2})$ .
  - c) Let  $X_1, X_2, X_3$  be a random sample taken from U (9,10) distribution. The compute the probability that the min  $\{X_1, X_2, X_3\}$  is less than 9.5
- Q3) Attempt any two of the following.
  - a) Let  $X \rightarrow C(\mu, \lambda)$  then derive the expression for characteristic function of X
  - b) Let X be a random variable with p.d.f.  $f(x) = \begin{cases} 2x, & 0 < x < 1 \\ 0, & otherwise \end{cases}$  Using

Chebychev's inequality, compute lower bound for  $\left( |X - \frac{2}{3}| < 1/3 \right)$ 

- c) If  $X \to \beta_1$  (m,n) with  $E(X) = \frac{1}{4}$  and  $Var(X) = \frac{1}{8}$  then find the values of 'm' and 'n'.
- *Q4*) Attempt any one of the following:
  - a) i) Let X and Y be two independent Gamma variates with parameters
    - $(\alpha, \lambda_1)$  and  $(\alpha, \lambda_2)$  respectively. then show that U=X+Y and V =  $\frac{X}{Y}$

are independently distribution random variable and identify their distributions. [7]

- ii) Let  $X \to C(0,1)$  then find  $P(X \le 1)$  [3]
- b) i) If  $\{X_n n \ge 1\}$  be a sequence of 1 and 0 with probabilities  $P_n$  and  $(1-P_n)$  respectively then examine whether the Weak law of Large numbers can be applied to the sequence  $\{X_n\}$ , where the variables  $X_n$  are independent. [6]
  - ii) Let  $X_1, X_2, \dots, X_n$  are independently and identically distributed U(0,1) random variates. Obtain distribution of max  $\{X_1, X_2, \dots, X_n\}$  [4]

[5 each]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Use of statistical tables and calculator is allowed.

*Q1*) Attempt each of the following.

- A) In each of the following cases, choose the correct alternative:
  - i) In case of Latin Square Design, the number of components into which total sum of squares in split into is
    - a) 2 b) 5
    - c) 4 d) 3
  - Consider an experiment with two fertilizers. Potash (K) with p different varieties and Nitrogen (N) with q different varieties. To test the effectiveness of different varieties of these two fertilizers which among the following experimental design should be used.
    - a) Latin Square Design
    - b) Factorial Design
    - c) Completely Randomized Design
    - d) Randomized Block design
  - iii) Which of the following diagram can be used to compared the treatment means
    - a) Normal Probability plot b) Histogram
    - c) Box plot d) Q-Q plot
- B) In each of the following. state whether the given statement is true or false: [1 each]
  - i) A  $2^3$  factorial experiment has 3 factors each at two levels.
  - ii) In case of partial confounding same factorial effect is confounded in each replicate.

[1 each]

[Max. Marks: 35

- *Q2*) Attempt any two of the following.
  - a) Show that mean sum of squares due to error is unbiased estimator of error variance  $\sigma^2$  in RBD.
  - b) Explain Yate's procedure to obtain factorial effect totals in 2<sup>3</sup> factorial experiment.
  - c) State one real life situation where followings designs can be used
    - i) Completely Randomized Design (CRD).
    - ii) Randomized Block Design (RBD).
    - iii) Latin Square Design (LSD).
- *Q3*) Attempt any two of the following.
  - a) State the model for CRD with assumptions. Obtain the least squares estimators of parameters involved in this model.
  - b) Obtain the formula of efficiency of RBD over corresponding CRD.
  - c) Explain the concept of confounding in factorial experiments by differentiating between total and partial confounding.
- Q4) Attempt any one of the following.
  - a) i) Explain the procedure for testing for equality of two specified treatment effects using critical difference method in case of LSD.
    - ii) Explain the basic principles of design of experiments.
  - b) i) Compute the relative efficiency of LSD with respect of RBD by using.
    - 1) Rows as blocks
    - 2) Columns as blocks

based on the following information:

Treatment Sum of Squares = 140.5.Raw Sum of Squares = 120.3. Column Sum of Squares = 195.7, Total Sum of Squares = 570.2, Number of Rows = 4

 Define factorial experiments. Provide analysis of variance (ANOVA) table for 2<sup>3</sup> factorial experiments.

# [5822]-568 T.Y. B.Sc. STATISTICS

# ST - 354 : Statistical Process and Product Control (2019 Pattern) (Semester - V) (35174)

Time : 2 Hours]

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- *3)* Use of Statistical tables and calculator is allowed.
- 4) Symblos and abbreviations have their usual meaning.

*Q1*) Attempt each of the following:

- (A) In each of the following cases, choose the correct alternative:
  - a) Which of the following indicates that the spread of the specification limits is greater than the spread of the process?

i) 
$$C_p = 1$$
  
ii)  $C_p = 0$   
iii)  $C_p < 1$   
iv)  $C_p > 1$ 

- b) Which of the following control chart types is applicable to monitor the number of errors per page in a printed document?
  - i)  $\overline{X}$  chart ii) R chart iii) R chart iv) X-MR chart
- c) In case of the p chart for unequal sample sizes and no standards specified, which of the following is the correct expression for the upper control limit corresponding to an i<sup>th</sup> sample?

i) 
$$p_i + 3\sqrt{\frac{p_i q_i}{n_i}}$$
  
ii)  $\overline{p} + 3\sqrt{\frac{\overline{pq}}{n_i}}$   
iii)  $\overline{p} + 3\sqrt{\frac{p_i q_i}{n_i}}$   
iv)  $p_i + 3\sqrt{\frac{pq}{n_i}}$ 

[Max. Marks : 35

[3×1=3]

SEAT No. :

[Total No. of Pages : 3

- (B) In each of the following, state whether the given statement is true or false: [2×1=2]
  - a) A histogram as a process control tool helps to study the nature of underlying probability distribution of the variable of interest.
  - b) Natural tolerance limits are specified for averages and not individual observations, and hence are plotted on control charts.
- **Q2)** Attempt any two of the following:

- a) Explain the working of a Double Sampling Plan. Also state the expression for evaluating the probability that a lot will be accepted under a Double Sampling Plan.
- b) For a continuous production process, it is given that  $\overline{R} = 34.28, \overline{\overline{X}} = 223, n = 5$ . If the upper and lower specification limits are 255 and 185 respectively, calculate the percentage of non-conformities.
- c) Explain the construction and working of p chart for process fraction defective not specified and unequal subgroup sizes.
- *Q3)* Attempt any two of the following:

[2×5=10]

- a) What are the three criteria for detecting lack of control situations with respect to control charts? Illustrate these criteria through sketches.
- b) Explain chance causes and assignable causes of variation. Classify each of the following as chance or assignable cause:
  - i) Machine operator falling asleep.
  - ii) Slight vibration in machine being used.
- c) The following information is given for a continuous production process:

 $\sum_{i=i}^{30} R_i = 300, \sum_{i=1}^{30} \overline{X}_i = 18000, n = 5, k = 30.$  From the given information,

calculate the following:

- i) Estimates of process average and process standard deviation
- ii) Control limits for *R* chart
- iii) Control limits for  $\overline{X}$  chart

[5822]-568

- *Q4*) Attempt any one of the following:
  - a) i) A Single Sampling Plan operates on lots of sizes 50000. A sample of size 40 is taken, and if the number of defectives in the sample is 3 or less, the lot is accepted. Calculate producer's risk if AQL = 0.03 and consumer's risk if LTFD = 0.10. [6]
    - ii) Explain what are specification limits and tolerance limits, along with the comparison between them. [4]
  - b) i) Explain the construction of OC curve for a Single Sampling Plan.

[3]

- ii) What is quality? Explain in brief the dimensions of quality. AsloExplain in brief the following process control (PC) tools:
  - A) Scatter plot
  - B) Check sheet
  - C) Pareto diagram

#### STATISTICS

# ST-355: Operations Research-I (2019 CBCS Pattern) (Semester - V) (35175)

Time : 2 Hours]

[Max. Marks : 35

[Total No. of Pages : 3

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Use of Scientific calculator and statistical table is allowed.
- 4) Symbols and abbreviations have their usual meaning.

*Q1*) Attempt each of the following.

- a) Choose the correct alternative in each of the following: [1 each]
  - i) If primal Linear Programming Problem (LPP) is of maximization type then dual problem is of
    - A) maximization type B) minimization type
    - C) equality type D) inequality type
  - ii) A solution which optimizes the objective function in linear programming problem is called as
    - A) Optimal solution B) Feasible solution
    - C) Solution D) Basic solution
  - iii) In a Transportation Problem (TP) the least cost method is used
    - A) to remove degeneracy
    - B) to find optimum solution
    - C) to find alternate solution
    - D) to find initial basic feasible solution
- b) In each of the following, state whether the given statement is true or false. [1 each]
  - i) Assignment problem can be treated as a particular case of transportation problem.
  - ii) Critical path method is probabilistic in nature.

- **Q2**) Attempt any two of the following.
  - a) Solve the following Linear Programming Problem (LPP) using the Simplex Method:

Maximize  $Z=10x_1 + 6x_2 + 6x_3$ Subject to  $3x_1 + 2x_2 + 2x_3 \le 240$  $2x_1 + 3x_2 + 3x_3 \le 270$  $x_1 \le 60$ 

$$x_1 \ge 0, x_2 \ge 0, x_3 \ge 0$$

- b) Define the following terms used in LPP.
  - i) alternate solution.
  - ii) feasible solution.
  - iii) basic solution.
  - iv) degenerate solution.
  - v) unbounded solution.
- c) Describe a TP. What do you mean by an unbalanced TP? Explain how to convert an unbalanced TP into a balanced TP with the help of one illustration.

#### *Q3*) Attempt any two of the following.

# i) What is key row, key column and key element in simplex method?[3]

- ii) What are the advantages of operations research? [2]
- b) Obtain the dual of the following LPP:

Maximize  $Z=5x_1 + 3x_2$ Subject to  $3x_1+2x_2 \le 6$  $3x_1+x_2=4$  $x_1,x_2 \ge 0$ 

c) A furniture dealer deals in only two items-tables and chairs. He has Rs.50,000 to invest and has storage space of at most 60 pieces. A table costs Rs.2,500 and a chair Rs.500. He estimates that from the sale of one table, he can make a profit of Rs. 250 and that from the sale of one chair a profit of Rs 75. He wants to know how many tables and chairs he should buy from the available money so as to maximize his total profit, assuming that he can sell all the items which he buys. Formulate the given LPP.

2

a)

[5 each]

*Q4*) Attempt any one of the following:

### [10 each]

- a) i) Describe Hungarian method of solving assignment problem (minimization case). [5]
  - ii) Find an initial basic feasible solution of the following T.P. by Vogel's approximation method. [5]

		1	1	1	
Destination	D,	$D_{2}$	$D_{\gamma}$	D,	Supply
	1	2	5	4	
Source					
S <sub>1</sub>	19	30	50	10	7
S <sub>2</sub>	70	30	40	60	9
S <sub>3</sub>	40	8	70	20	18
Demand	5	8	7	14	

b) i) A project consists of seven activities with the following relevant information.

Activity	Immediate	Time Estimates		
	Predecessor	Optimistic	Mostlikely	Pessimistic
А		2	5	8
В	А	6	9	12
C	А	5	14	17
D	В	5	8	11
Е	C,D	3	6	9
F		3	12	21
G	E,F	1	4	7

Using the information given, construct the project network diagram. Find the expected time estimates and variance of each activity.[5]

- ii) Explain the following terms as regard to Critical Path Method (CPM): [5]
  - 1) earliest start time
  - 2) earliest finish time
  - 3) latest start time
  - 4) latest finish time
  - 5) critical path.

### ST - 356 : Regression Analysis

#### (35176) (2019 CBCS Pattern) (Semester - V) (Paper - VI)

*Time : 2 Hours]* 

[Max. Marks : 35

Instructions to the candidates:

- 1) All questions are compulsory.
- 2) Figures to the right indicate full marks.
- 3) Use of Statistical tables and calculator is allowed.
- 4) Symbols and abbreviations have their usual meaning.

*Q1*) Attempt each of the following.

- a) In each of the following cases, choose the correct alternative : [1 each]
  - i) If all observations of response variable are located on a straight line passing through origin, then the co-efficient of determination is
    - A) 0 B) 0.25
    - C) 0.5 D) 1
  - ii) A large absolute value of studentized residual indicates
    - A) outliers
    - B) observation are very close
    - C) coefficient of determination is negative
    - D) model is good

- iii) Which of the following method is used to estimate parameters of logistic regression model?
  - A) least square method
  - B) maximum likelihood method
  - C) minimum chi-square method
  - D) variance stabilizing transformation method
- b) In each of the following, state whether the given statement is true or false : [1 each]
  - i) The sum of residuals weighted by the corresponding fitted value is always zero.
  - ii) The covariance matrix of residual vector (e) is given by  $\sigma^2 (X'X)^{-1}$ .

*Q2*) Attempt any two of the following.

#### [5 each]

- a) Consider the simple linear regression model,  $Y = \beta_0 + \beta_1 x + \varepsilon$  with  $E(\varepsilon) = 0$ ,  $Var(\varepsilon) = \sigma^2$  and  $\varepsilon_i$ , i = 1, 2, ..., n uncorrelated. Show that  $E(MS_R) = \sigma^2 + \beta_1^2 \sum_{i=1}^n (x_i \overline{x})^2$ .
- b) For a multiple linear regression model,  $Y = X\beta + \varepsilon$  construct  $100 (1 \alpha)\%$  confidence interval for the regression coefficient  $\beta_j$ , j = 0, 1, 2, ..., k.
- c) Explain the concept of multiple logistic regression.
- *Q3*) Attempt any two of the following.

#### [5 each]

- a) Consider the simple linear regression model,  $Y = \beta_0 + \beta_1 x + \varepsilon$  where the intercept  $\beta_0$  is known. Find the least squares estimator  $\hat{\beta}_1$  of  $\beta_1$ . Also, find the variance of  $\hat{\beta}_1$ .
- b) Describe the procedure of testing significance of individual regressors in multiple linear regression model.
- c) Explain in brief model deviance and LR test. Also, interpret the parameters in a logistic regression model.

[5822]-570

- *Q4*) Attempt any one of the following.
  - a) i) Explain how residual plots are useful in verifying the assumptions in linear regression model. [5]
    - ii) In a simple linear regression problem with sample size 20, the slope was found to be 2.5 and standard error estimate  $(\hat{\sigma})$  is equal to 10.15. The quantity  $\sum_{i=1}^{20} x_i^2 n\overline{x}^2 = 400$ . Compute the standard error of the regression slope coefficient  $(\beta_1)$ . Test whether the regression coefficient is different from zero at a 5% level of significance. [5]
  - b) i) Show that, for the multiple linear regression model with *k* regressors,

$$F = \frac{R^{2}(n-k-1)}{k(1-R^{2})}.$$
[5]

ii) State the formulae for standardized residual and studentised residual for linear regression model. Also, state the difference between them.

	B)	Diag of re	grammatically represent respiratory system and enlist the patho espiratory system.	gons [4]	
Q3)	A)	Exp	lain the following any three.	[6]	
		i)	Sources of infection.		
		ii)	Laboratory diagnosis of syghilis.		
		iii)	Enlist the toxins produced by <u>clostridium tetani</u> .		
		iv)	What is acid fast bacteria give its example.		
	B)	Des	cribe biochemical character of <u>Nisseria meningitids</u> .	[4]	

[Total No. of Pages : 2

- Q4) A) Discuss the following any three.
  - Name of disease caused by Nisseria gonorrhoeae. i)
  - ii) Laboratory diagnosis of mycobacterim leprae.
  - Symptoms of enteric fever. iii)
  - iv) Enlist the name of media for laboratory diagnosis of leptospira.
  - What is the use of case control method in epidemiology. B) [4]
- Q5) Write short notes on any four of the following.
  - Diagnosis of Rickettsia a)
  - Antigenic structure of strepto coccus pyogenes b)
  - Laboratory diagnosis of treponema pallidum. c)
  - Biochemical characters of strepto coccus pneumoniae. d)
  - Widal test. e)
  - Spotted fever. f)

## [5822] - 580 T.Y. B.Sc. **MICROBIOLOGY MB - 352 : Immunology** (2019 CBCS Pattern ) (Semester - V)

*Time : 2 Hours]* Instructions to the candidates:

Question No.1 is compulsory. 1)

- 2) Solve any three Questions from Q.No. 02 to Q.No. 05.
- Question No. 2 to 5 carry equal marks. 3)

Q1) Answer any five of the following.

- Name the lumphoid organ where all blood cells including lymphocytes a) are produced.
- What are defensins? b)
- Enlist the cardinal signs of Inflammation. c)
- d) MHC of humans is referred to as \_\_\_\_\_.
- Define antibody affinity. e)
- Define allografts and give examples. f)
- **Q2**) A) Describe (Any three)
  - Function of lymphatic system. a)
  - Lattice hypothesis. **b**)
  - Any two applications of monoclonal antibodies. c)
  - Structure and function of dendritic cell. d)
  - B) Explain graft rejection mechanisms.

*P.T.O.*

[*Max. Marks* : 35

**SEAT No. :** 

- Q3) A) Answer (Any Three)
  - a) Discuss positive selection of thymocytes.
  - b) Draw a neat labelled diagram of gene organization of human MHC.
  - c) Enlist different types of grafts.
  - d) Write the functions of light and heavy chain domains of antibodies.
  - B) With neat labelled diagram explain immunoflourescence technique. [4]

<b>Q4</b> )	A)	Explain (Any Three)	[6]		
		a) Role of Toll Like receptors.			
		b) Haptens with examples.			
		c) HAT selection technique.			
		d) Principle of agglutination reaction.			
	B) Explain any two mechanisms of antibody diversity.				
Q5)	Wri	te short notes on (Any Four)	[10]		
	a)	Factors affecting immunogenecity.			
	b)	Phagocytosis.			
	c)	Indirect ELISA.			
	d)	Structure of class I MHC.			
	e)	Structure of Thymus.			
	f)	T I antigens.

## (CBCS) (2019 Pattern) (Semester-V) (35193)

Time : 2 Hours]

Instructions to the candidates:

- 1) Q.1 is compulsory.
- 2) Solve any three questions from Q.2 to Q.5
- 3) Q.2 to 5 carry equal marks.

*Q1*) Solve any five of the following.

- a) Active form of vitamin D is
- b) Define specific activity of an anzyme.
- c) State true or false: Allosteric enzymes show hyperbolic graph for its activity.
- d) Enlist various isotopes used for biological enzyme assay.
- e) Km is independent of substrate concentration. state true or false.
- **Q2**) a) Describe the following (any Three.)
  - i) Adsorption chromatography.
  - ii) Properties of allosteric enzymes.
  - iii) State Michaelis-menton equation & its graphical representation.
  - iv) Feed back repression in enzyme regulation.
  - b) What is salting in & salting out? Describe how it is used for enzyme purification. [4]

[5]

[6]

- [6] *Q3*) a) Answer any three of the following. Biochemical function of Thiamine pyrophosphate. i) Enlist various chemical methods of determination of aminoacids at ii) active site of enzyme. Enlist principles & significance of enzyme assays iii) Ion exchange chromatography in enzyme purification. iv) What are isozymes? Describe with suitable example. [4] b) Describe any three of the following. **[6] Q4**) a) Enlist methods of immobilization of enzymes. Describe any one in i) detail. Spectrophotometric assays for enzyme. ii) Enlist various sources of Vit D. iii) How will you obtain intracellular enzyme for purification. iv) b) Derive Brigg's Haldane equation for determination of initial velocity of an enzyme. [4] Q5) Write short notes on any four. [10]
  - a) Multienzyme complex.
  - b) Vmax
  - c) X-ray crystallography.
  - d) Lineweaver. Burk plot.
  - e) Enzyme compartmentation in enzyme activity vegulation.
  - f) Koshland model for allosteric enzyme.

## [5822]-582 T.Y. B.Sc. MICROBIOLOGY MB - 354 : Genetics

(2019 CBCS Pattern) (Semester - V) (35194) (Paper - IV)

Time : 2 Hours] Instructions to the candidates:

> 1) Question 1 is compulsory.

- 2) Solve any three questions from Q.2. to Q.5.
- Questions 2 to 5 carry equal marks. 3)

*Q1*) Attempt any five of the following.

- Name the enzyme involved in primer replacement during DNA replication a) in E.Coli.
- State the role of enhancers in eukaryotic transcription. b)
- Which are the structural genes in lac operon? c)
- Name the components of 30s subunit of prokaryotic ribosome. d)
- State  $S \rightarrow R$  variation in Pneumococci observed by F. Griffith. e)
- What are F' strains of E.Coli? f)
- Attempt any three of the following. *Q2)* A)
  - State the role of DNA polymerase III and DNA ligase in DNA a) replication.
  - What is the role of rho  $(\rho)$  factor in termination of prokaryotic **b**) transcription.
  - State the function of tRNA in translation. c)
  - What is homologous recombination? d)
  - With suitable diagram explain initiation of transcription in eukaryotes.[4] B)

*P.T.O.*

### Instructions :

- 1) Q.1 is compulsory.
- 2) Solve any three questions from Q2 to Q5.
- 3) Questions 2 to 5 carry equal marks.

Q1) Solve <u>any five</u> of the following.

- a) Define thermisation.
- b) What is the composition of milk.
- c) Lactoferrin is \_\_\_\_\_ in milk.
  - i) Vitamin
  - ii) Naturally Occuring preservative
  - iii) Aminoacid
  - iv) Calcium and iron source
- d) Enlist chemicals used for preservation of dairy products.
- e) Define homogenized milk.
- f) Enlist organism responsible for ropiness of milk.
- **Q2)** a) Attempt any three of the following :
  - i) Enlist sources of microorganisms for contamination of milk duing collection & storage.
  - ii) Enlist various time temp. relationship used in pasteurization.
  - iii) Enlist various flavour defects in milk.
  - iv) Enlist any four sanitary standard operating procedures in quality assurance of milk.
  - b) Describe stormy fermantation of milk with organisms involved in it. [4]

[5]

[6]

- *Q3*) a) Solve any three of the following
  - i) What is colostrum? Give its composition.
  - ii) Describe color defects in milk w.r.t. organisms responsible for it.
  - iii) What is the role of bacteriocins of LAB?
  - iv) What do you mean by HACCP?
  - b) Describe the process of spoilage of milk & microorganisms involved in it. [4]
- *Q4*) a) Atempt any three of the following
  - i) How will you control on biofilm on various equipments for safety concern of milk.
  - ii) What do you mean by sweet curdling of milk?
  - iii) Enlist physicochecimical properties of milk of buffalo.
  - iv) What is the difference between skimmed and dehydrated milk.
  - b) Enlist good manufacturing practices for a quality of milk products. [4]
- **Q5)** Write short notes on any four :
  - a) Sweet curdling of milk.
  - b) Food grade biopreservatives.
  - c) Microflora of milk.
  - d) Efficiency of pasteurization.
  - e) Quality assvantance in daily industry.
  - f) Contamination of milk during transport of milk.

Tim	e : 2	2 Hours] [Max. Marks :		
Inst	ructi	ions to the candidates:		
	1) 2)	Solve any three questions from 0, 2 to 0, 5.		
	<i>3</i> )	Questions 2 to 5 carry equal marks.		
	<i>4</i> )	Draw neat and labelled diagram wherever necessary.		
	5)	Figures to the right indicate full marks.		
Q1)	At	tempt any FIVE of the following.	[5]	
	a)	Define mesoporous material.		
	b)	What is seive effect?		
	c)	List the control devices for particulate contaminants.		
	d)	Define 'Absorption in air'.		
	e)	Define 'Domestic water'.		
	f)	Why there is need for water management?		
Q2)	A)	Attempt any one of the following.	[6]	
		a) Explain in breif methods for waste water treatment.		
		b) Explain methods for the measurement of air pollution and its con	trol.	
	B)	Explain 'Air pollution'.	[4]	
Q3)	A)	Attempt any one of the following.	[6]	
		a) Explain 'pollution control equipment' in detail.		
		b) State and explain 'The clean air act and Nanotechnology'.		
	B)	Explain 'Hierarchy of solid structure' and adsorption.	[4]	

[4]

SEAT No. :

[Total No. of Pages :2

<b>Q4</b> ) A)	Atte	Attempt any one of the following.				
	a)	a) Explain nanocomposites for environmental applications.				
	b)	Write detail on mesoporous materials as adsorbents.				
B)	Exp	lain in detail Advantages of Nanomaterial.	[4]			

[10]

Q5) Write short notes on any four of the following.

- Anaerobic filters. a)
- Water pollution. b)
- Oxidation ditches. c)
- Waste water collection. d)
- Air pollution. e)
- Cyclone separator. f)

*Time : 2 Hours]* 

Instructions to the candidates:

- 1) Q. 1 is compulsory.
- 2) Solve any three questions from Q.2 to Q.5.
- 3) Questions from 2 to 5 carry equal marks.
- *Q1*) Solve any Five of the following :
  - a) Who gave the Sociocultural theory of cognitive Psychology.
  - b) Define attention.
  - c) Define perceptual Constancy.
  - d) State the types of long term memory.
  - e) Founder of insightful learning.
  - f) Define forgetting.
- Q2) a) Explain the divided, attention, selective attention sustained attention.[6]

OR

How does operant conditioning effect learning behavior?

- b) Critically evaluate the information processing perspective of cognitive psychology. [4]
- **Q3**) a) Explore the practical applications of cognitive Psychology. [6]

OR

Describe the various causes of forgetting.

b) Evalute the laws of trial and error method of learning. [4]

*P.T.O.* 

SEAT No. :

[Total No. of Pages : 2

[Max. Marks : 35]

[5]

Explain the insightful learning method with the help of experiment. [6] **Q4**) a) OR

Describe the factors affecting problem solving behavior.

Illustrate the processes involved in sensation, attention & perception.[4] **b**)

[10]

- **Q5**) Write short notes on any four of the following :
  - Thinking Cognitive process a)
  - Nature of cognitive psychology b)
  - Internal determinants of attention c)
  - d) Color constacy
  - Types of attention e)
  - Episodic memory f)

	e)	What is sanitation?	
	f)	Give any two names of insert pest.	
Q2)	Att	empt the following questions :	
	a)	Comment on seed borne nematodes.	[6]
	b)	Write the objectives of seed health testing?	[4]
<b>Q3</b> )	Att	empt the following questions :	
	a)	Explain the seed transmitted pathogens.	[6]
	b)	Give the importance of seed testing?	[4]

*P.T.O.* 

- Q4) Attempt the following questions :
  - Explain the characters of order Hemiptera. [6] a)
  - What are seed borne pathogens? [4] **b**)

[10]

- **Q5**) Write a short notes on four of the following :
  - Seed entomology. a)
  - **b**) Economic importance of seed pathology in seed industry.
  - c) Structures for seed storage.
  - Influence of environmental factors on seed borne disease. d)

000

- Seed treatment. e)
- f) Air conditioning.
- Washing test. g)

# **VOCATIONAL (SEED TECHNOLOGY) ST - 3.2 : Entrepreneurship Development**

(CBCS) (2019 Pattern) (2 Credits) (Semester - V) (35892)

Time	e : 2 I	[Max. Marks : 35	
Inst	ructio		
	1)	Q. 1 is compulsory.	
	2)	Solve any three questions from Q.2 to Q.5.	
	3)	Questions 2 to 5 carry equal marks.	
<b>Q1</b> )	So	lve any five of the following :	[5]
	a)	Define entrepreneur.	
	b)	What is Joint Stock Company?	
	c)	What is partnership.	
	d)	Full form of MSSIDC	
	e)	Full form of SIDBI	
	f)	What is VAT?	
Q2)	At	tempt the following questions :	
	a)	Give socio economic origins of Entrepreneurship.	[6]
	b)	Give role of commercial funding agency.	[4]
Q3)	At	tempt the following questions :	
	a)	Describe Entrepreneurial process.	[6]
	b)	Give characteristics of Entrepreneur.	[4]
			P.T.O.

- *Q4*) Attempt the following questions :
  - a) Explain on commercial and cooperative bank [6]
  - b) Give relative merits of partnership. [4]

*Q5*) Write a short notes on any FOUR of the following : [10]

- a) Marketing strategy
- b) Web browsing
- c) Marketing mix and its effect
- d) PMYR-Loans,
- e) Criteria for selection of new product or service

f) Ideas to start new business

# T.Y. B.Sc. (Vocational) 35825 : INDUSTRIAL MICROBIOLOGY IMB 355 : Applications of Microbial Systems (CBCS) (2019 Pattern) (Semester - V)

Time : 2 Hours]			[Max. Marks : 35	
Instr	uctio			
	1) Q.1 is compulsory.			
	2)	Q.2 to Q.5 solve any 3.		
	3)	Q.2 to Q.5 carry equal marks.		
<b>Q1</b> )	So	lve any 5 of the following :	[5]	
	a)	What are bar screens?		
	b)	Name two chemical disinfectants.		
	c)	What is Insitu Bioremediation?		
	d)	What is nutrient cycling?		
	e)	What are functional foods?		
	f)	State example of Prebiotic.		
<b>Q</b> 2)	So	lve the following :		
_	a)	Explain removal of nitrogen using biological method.	[6]	
		OR		
		Explain therapeutic use of fermented foods.		
	b)	Write note on trickling filter.	[4]	
	,	C		
<b>Q3</b> )	So	lve the following :		
	a)	Describe working of any one anaerobic treatment met	hod. <b>[6</b> ]	
	,	OR		
		Write note on Biofuels.		
	h)	Give descriptive account of fermented foods	[4]	
	0)	Sive descriptive decount of fermented foods.	[4]	
			Р.Т.О.	

- *Q4*) Solve the following :
  - a) Write note on sewage treatment plant.

#### OR

Write note on production of bio pesticides.

b) Write note on Nutrient cycling. [4]

5.

[6]

[10]

- *Q5*) Write notes on solve any 4.
  - a) Refractory organics.
  - b) Dissolved Air flotation.
  - c) Working of up flow Bioreactor.
  - d) Bio pesticides.
  - e) Probiotics and Prebiotics.
  - f) Functional Dairy foods.

## T.Y. B.Sc. (Vocational) INDUSTRIAL MICROBIOLOGY IMB - 356 : Cell Culture Technology

(2019 Pattern) (CBCS) (Semester - V) (Paper - VI) (35826)

#### *Time : 2 Hours]*

Instructions to the candidates:

- 1) Q. 1 is compulsory.
- 2) Solve any three questions from Q.2 to Q.5.
- 3) Q. 2 to Q.5 carry equal marks.
- *Q1*) Solve any 5 of the following :
  - a) State the importance of serum in maintenance of animal cells.
  - b) State an example of fibroblast cell line.
  - c) State the function of phenol red in ATC media.
  - d) Which type of microscope can be used to visualize animal cell lines?
  - e) What is the role of Aminoterin in somatic hybridization technique?
  - f) State an example of mAb used in therapy.
- *Q2*) Solve the following :
  - a) Describe the types of fermenters used for large scale culture of animal cells. [6]

#### OR

Describe the process of transgenesis.

b) Explain the concept, type and application of stem cells. [4]

*P.T.O.* 

[Total No. of Pages : 2

[Max. Marks : 35]

[5]

SEAT No. :

- **Q3**) Solve the following :
  - a) Explain the structure, function and application of Hollow fibre Reactor.[6]

#### OR

Explain the process of establishing organ culture.

- b) Write a short note on IVF. [4]
- *Q4*) Solve the following :
  - a) Discuss the concept of animal cell culture. [6]

#### OR

Discuss the impact of development of hybridoma technology.

- b) Write a short note on application of organ culture. [4]
- **Q5**) Write short notes on any four of the following : [10]
  - a) Types of animal cell culture based on morphology.
  - b) Role of Serum in ATC medium.
  - c) ATCC
  - d) Different methods for disaggregation of animal cells from tissue.
  - e) Characterization of cell lines.
  - f) Difference between normal and transformed cells.

# T.Y. B.Sc. (Semester - V) INDUSTRIAL MICROBIOLOGY IMB3510 : Plant Tissue Culture (2019 CBCS Pattern) (358210)

Time	e : 2 H	[Max. Marks : 3	5
Instructions to the candidates:			
	1)	Q.1 is compulsory.	
	2)	Solve any three questions from Q.2 to Q.5.	
	3)	Q2 to Q5 carry equal marks.	
<b>Q1</b> )	Solv	e any 5 of the following : [5	5]
	a)	State importance of plant tissue culture.	
	b)	Give an example of trans genic plant.	
	c)	What is meant by protoplast fusion?	
	d)	Optimal pH for PTC is	
	e)	What are virus free plants?	
	f)	Surface sterilization of plants is carried out by using	
Q2)	Solv	e the following :	
	a)	Describe the types of different plant Tissue culture. [6	5]
		OR	
		Describe different advantages of plant tissue culture over conventiona farming.	al
	b)	Write short note on Trans genic plants. [4	[]

- Q3) Solve the following :
  - a) Explain Gene gun method of transformation. [6]

#### OR

Explain the process of micropropogation in detail.

- b) Enlist and describe atleast two types of trans genic plants with examples. [4]
- **Q4**) Solve the following :
  - a) Discuss the protocol for setting callus culture from Datura plant. [6]

#### OR

Explain the shortcomings of plant tissue culture.

b) Write short note on Syn - Seeds [4]

[10]

- Q5) Write short note on any four of the following :
  - a) Haploid Plants
  - b) MS Medium
  - c) Bt crops
  - d) Ti plasmid
  - e) Transformation of plant cells
  - f) Somatic embryos

# T.Y. B.Sc. (Vocational) ELECTRONIC EQUIPMENT MAINTENANCE VOC-EEM-355 : Trouble Shooting & Repair of Audio and Video Equipments

(CBCS) (2019 Pattern) (Paper - V) (Semester - V) (35811)

Time	e : 2 H	[Max. Marks	: 35	
Instr	ructio	ns to	the candidates:	
	1)	Q.1 i	is compulsory.	
	2)	Solve	e any three questions from Q.2 to Q.5.	
	3)	<b>Q</b> . N	o. 2 to Q. No. 5 carry euqal marks.	
<b>Q1</b> )	Atte	mpt a	any <u>five</u> of the following :	[5]
	a)	One	can build his own Satellite receiver. Comment.	
	b)	Wha	at is If frequency in AM radio receiver?	
	c)	Wha	at is digital TV?	
	d)	Wha	at kind of modulation is used in TV?	
	e)	Whi	ch loudspeaker is normally used in PA system?	
	f)	Whi	ch battery type is used in Laptap?	
Q2)	a)	i)	Explain in brief the working principle of plasma T.V.	[3]
		ii)	Explain in brief the fault diagnosis of CRT monitor.	[3]
	b)	Give	e in detail troubleshooting steps of VCD player.	[4]
<b>Q3</b> )	a)	i)	Give at least two faults with blue ray disc. Also give remedies them.	for [3]
		ii)	Give at least two faults with Laptap. Also suggest remedies them.	for [3]
	b)	Expl	lain in brief working principle of inkjet printer.	[4]

- *Q4*) a) i) Give two common faults with ACD player. Also give remedies for them.
  - ii) Describe in brief the troubleshooting of FM receiver. [3]

**[10]** 

- b) Draw the block diagram of PA system. Also explain in brief the procedure of troubleshooting. [4]
- **Q5**) Attempt any <u>four</u> of the following :
  - a) Write in brief about the types of catridges used in different printers.
  - b) Compare dot matrix printer with laser printer.
  - c) Explain in brief the working principle of laser printer.
  - d) What is set top box? Give its two performance parameters.
  - e) Differentiate between audio CD & Video CD.
  - f) Give at least one performance parameters of home theatre. How to improve it?

# ELECTRONIC EQUIPMENT MAINTENANCE VOC-EEM-356 : Electronic Instrumentation (2019 Pattern) (CBCS) (Semester - V) (Paper - VI) (35812)

Time : 2 Hours]

Instructions to the candidates:

- 1) Question No. 1 is compulsory.
- 2) Solve any three questions from Q. No. 2 to Q. No. 5.
- 3) Questions No. 2 to 5 carry equal marks.

Q1) Attempt any five of the following

- a) Define accuracy.
- b) How to measure impedance?
- c) What is sensor?
- d) What is ladder diagram?
- e) What is real time analysis?
- f) What is PLC?
- Q2) a) Solve the following :
  - i) Give at least one example of instrumentation system in electronic industry. Give it's application. [3]
  - ii) What is error? How to obtain it from accuracy? [3]
  - b) Draw the block diagram of general instrumentation system in electronic industry. Give its application. [4]

[5]

Q3)	a)	Answer the following. [6]	
		i) What is logic analyser? Give its one application.	
		ii) What is distortion analyser? Give it's one applications.	
	b)	Draw the block diagram of DSP. Give its one application.	[4]
Q4)	a)	Solve the following.	[6]
		i) What is ATE? Where it is used?	
		ii) What is distortion? How to analyser it?	
	b)	Write a detailed note on PLC.	[4]
Q5)	Atte	empt any four of the following :	[10]
	a)	What is tracability?	
	b)	What is difference between force sensor & pressure sensor?	
	c)	Give example of temperature sensor. Give it's applications.	
	d)	Differentiate between data processing and acquisition.	
	e)	What is simulation? How to use it in PLC?	
	f)	Write a note on DVM.

# DEFENCE AND STRATEGIC STUDIES 35235 : Research Methodology

## (2019 Pattern) (Semester - V)

Time : 2 Hours]			[Max. Marks : 35
Instr	ructio		
	1)	All questions are compulsory.	
	2)	Figures to the right indicate full marks.	
<b>Q1</b> )	Det	fine the following questions	[5]
	i)	Define Research Methodology.	
	ii)	Define Methodology.	
	iii)	Define Research Formulation.	
	iv)	Define Research problems.	
	v)	What is Research Formulation?	
Q2)	Wr	ite short notes on (any two)	[10]
	i)	Research Report	
	ii)	Research Design	
	iii)	Research	
Q3)	Att	empt the following questions (any two)	[10]
	i)	Explain the Meaning and Concept of Research.	
	ii)	State the Aims and objectives of research.	
	iii)	State the Process of Problem Formulation.	

- Q4) Answer in details (any one)
  - i) Describe in detail significance and characteristics of research.
  - ii) Describe in detail Objectives of Research Design.
